

# Co-Firing in FBC

-

## A Challenge for Fuel Characterization and Modelling

Mikko Hupa

Åbo Akademi  
Process Chemistry Group

44<sup>th</sup> IEA - FBC Meeting  
May 27 - 28, 2002, Vienna, Austria

# ***Fuels Behaviour in FBC – Predictor Development at Åbo Akademi***

*This presentation: Fouling/Slagging/Corrosion/Trace Metals:*

**Rainer Backman, Bengt-Johan Skrifvars  
Patrik Yrjas, Maria Zevenhoven, Christian Mueller**

*(Additional development: Nitrogen Oxides Emissions:*

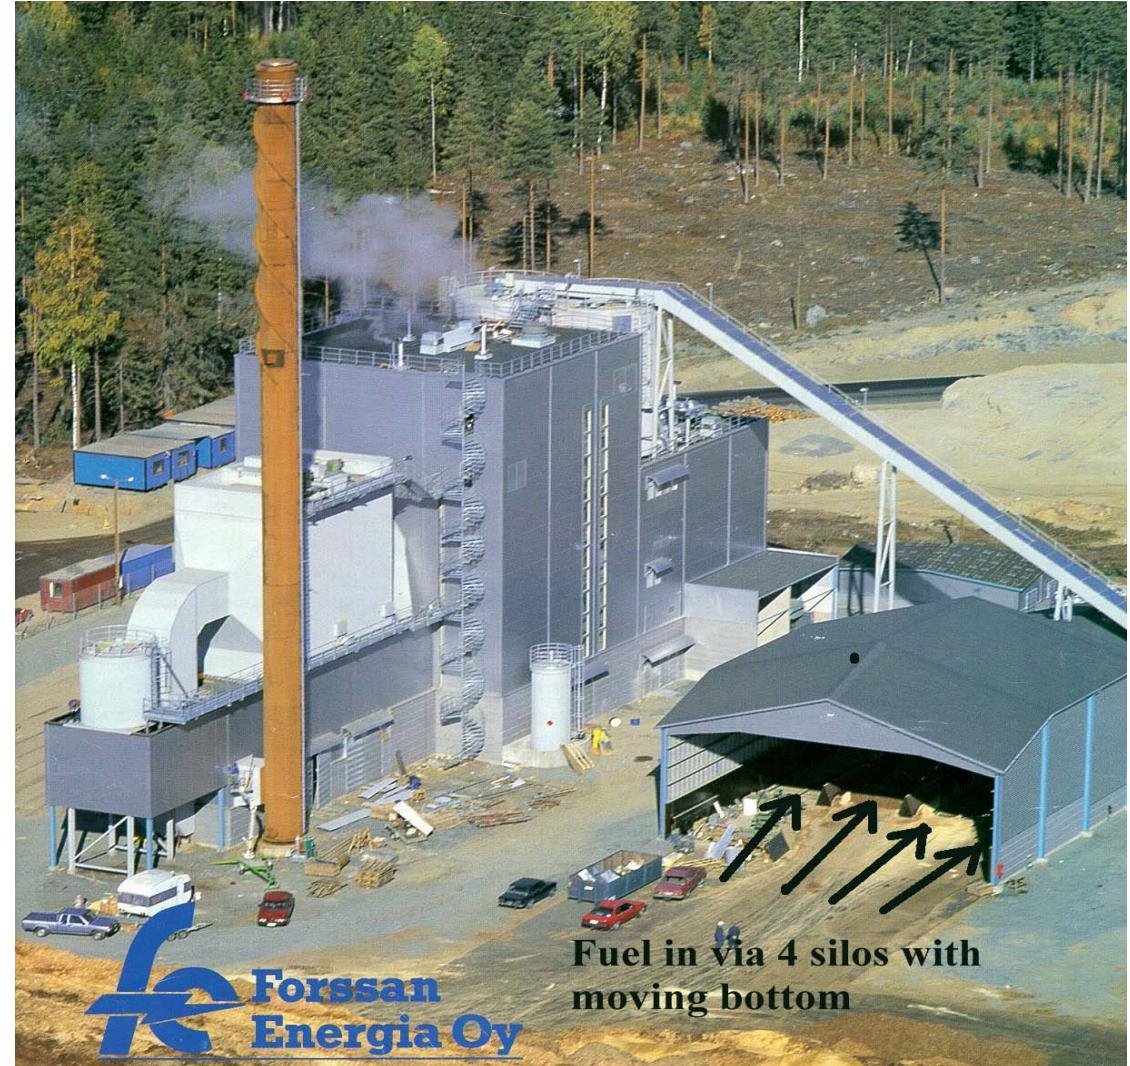

**Pia Kilpinen, Sirpa Kallio, Jukka Konttinen)**

Multi-fuel BFB:  
Wood chips, saw dust,  
forest residue, bark,  
peat (back-up fuel)

Capacity : 66 MW<sub>th</sub>

Steam: 2.8 kg/s,  
61 bar, 510°C

Energy production:  
17.2 MW<sub>el</sub> + 48 MW<sub>heat</sub>

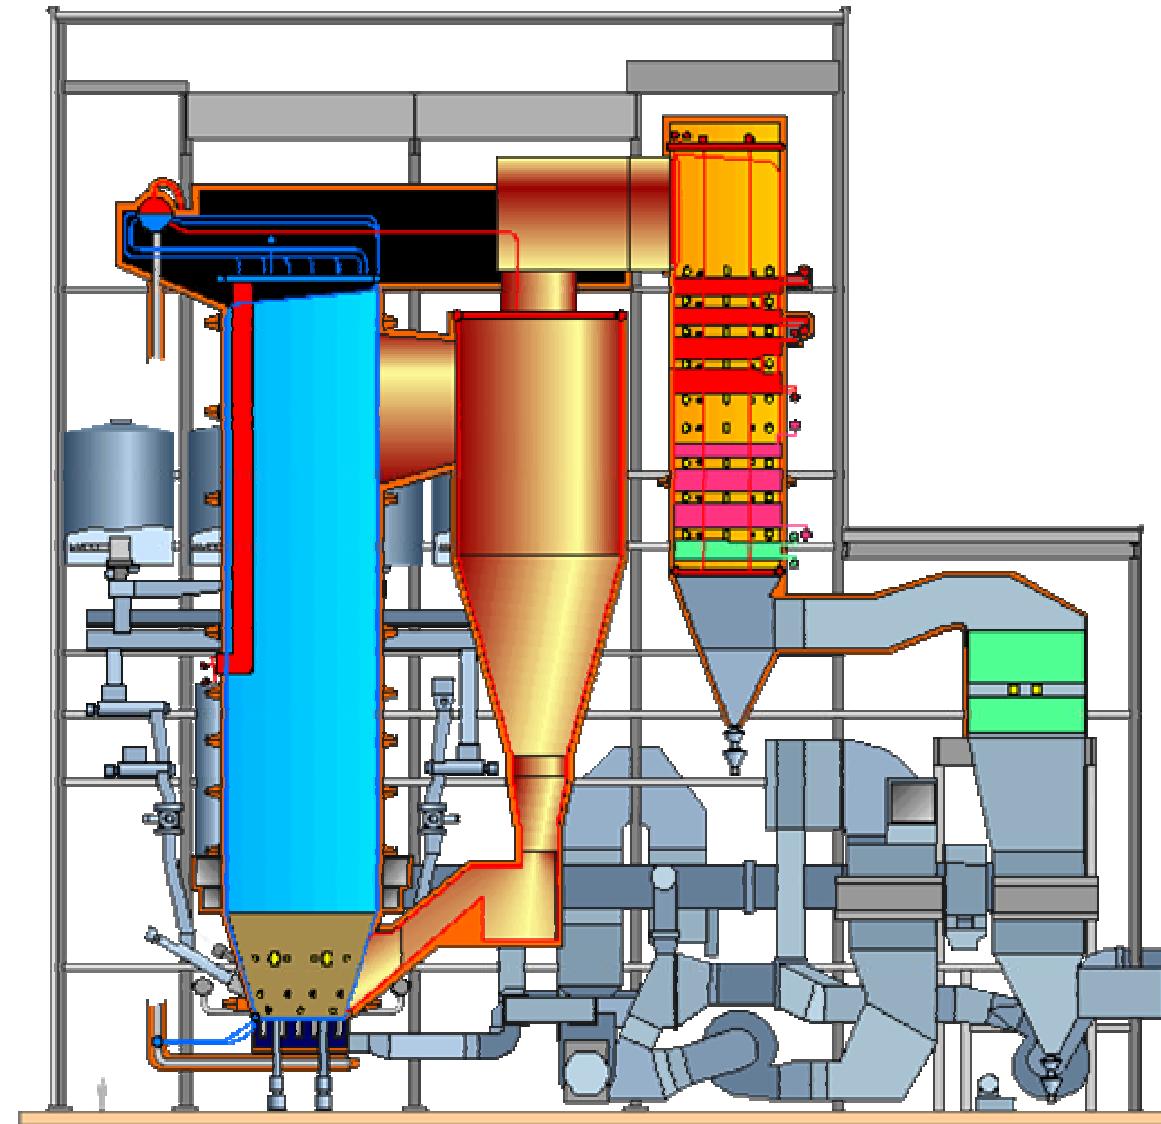

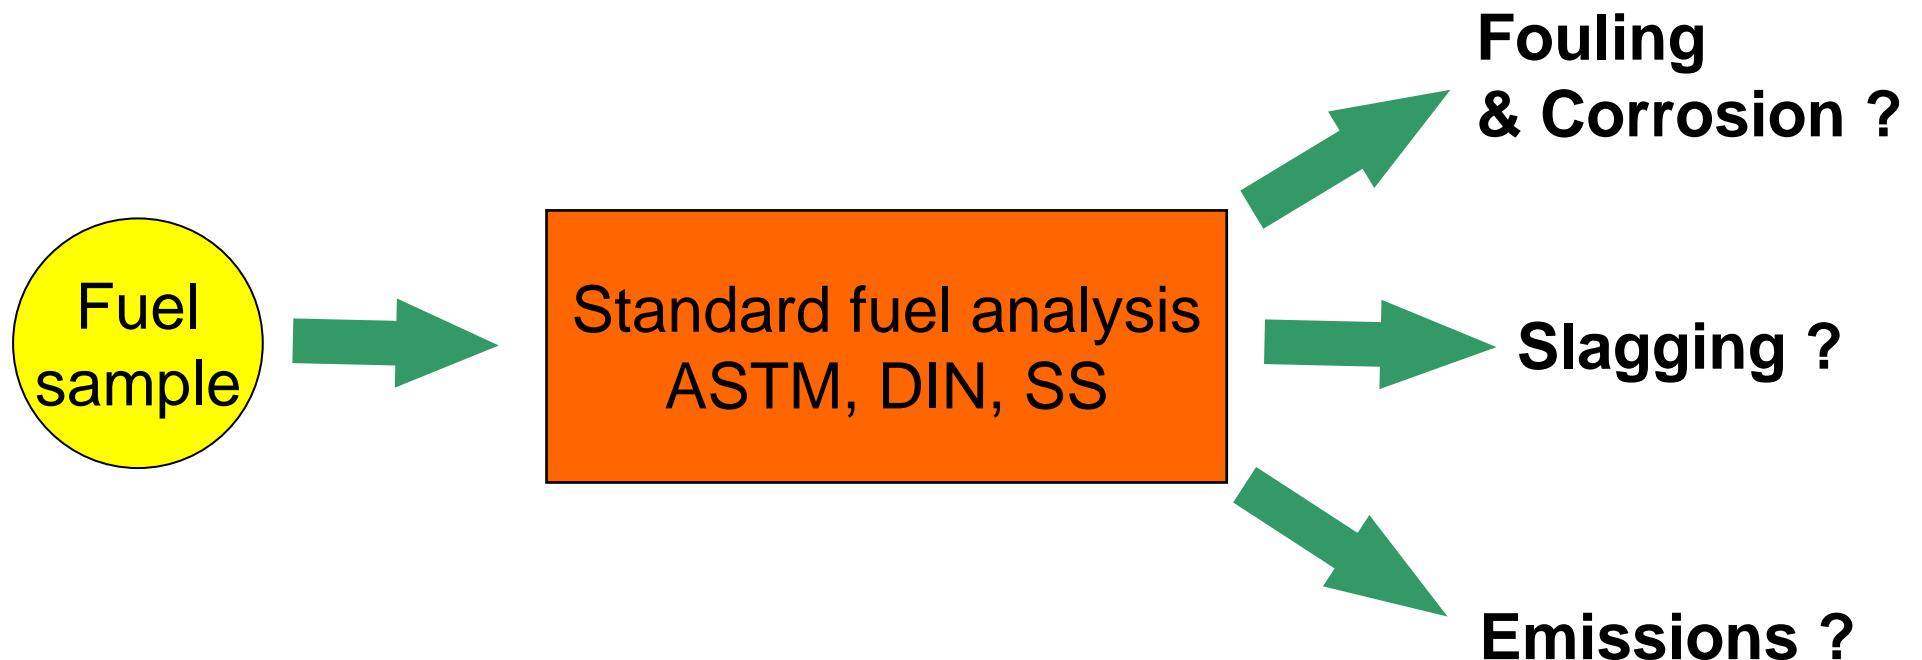

Multi-fuel CFB:  
Peat, bark,  
wood residue,  
coal (back-up fuel)

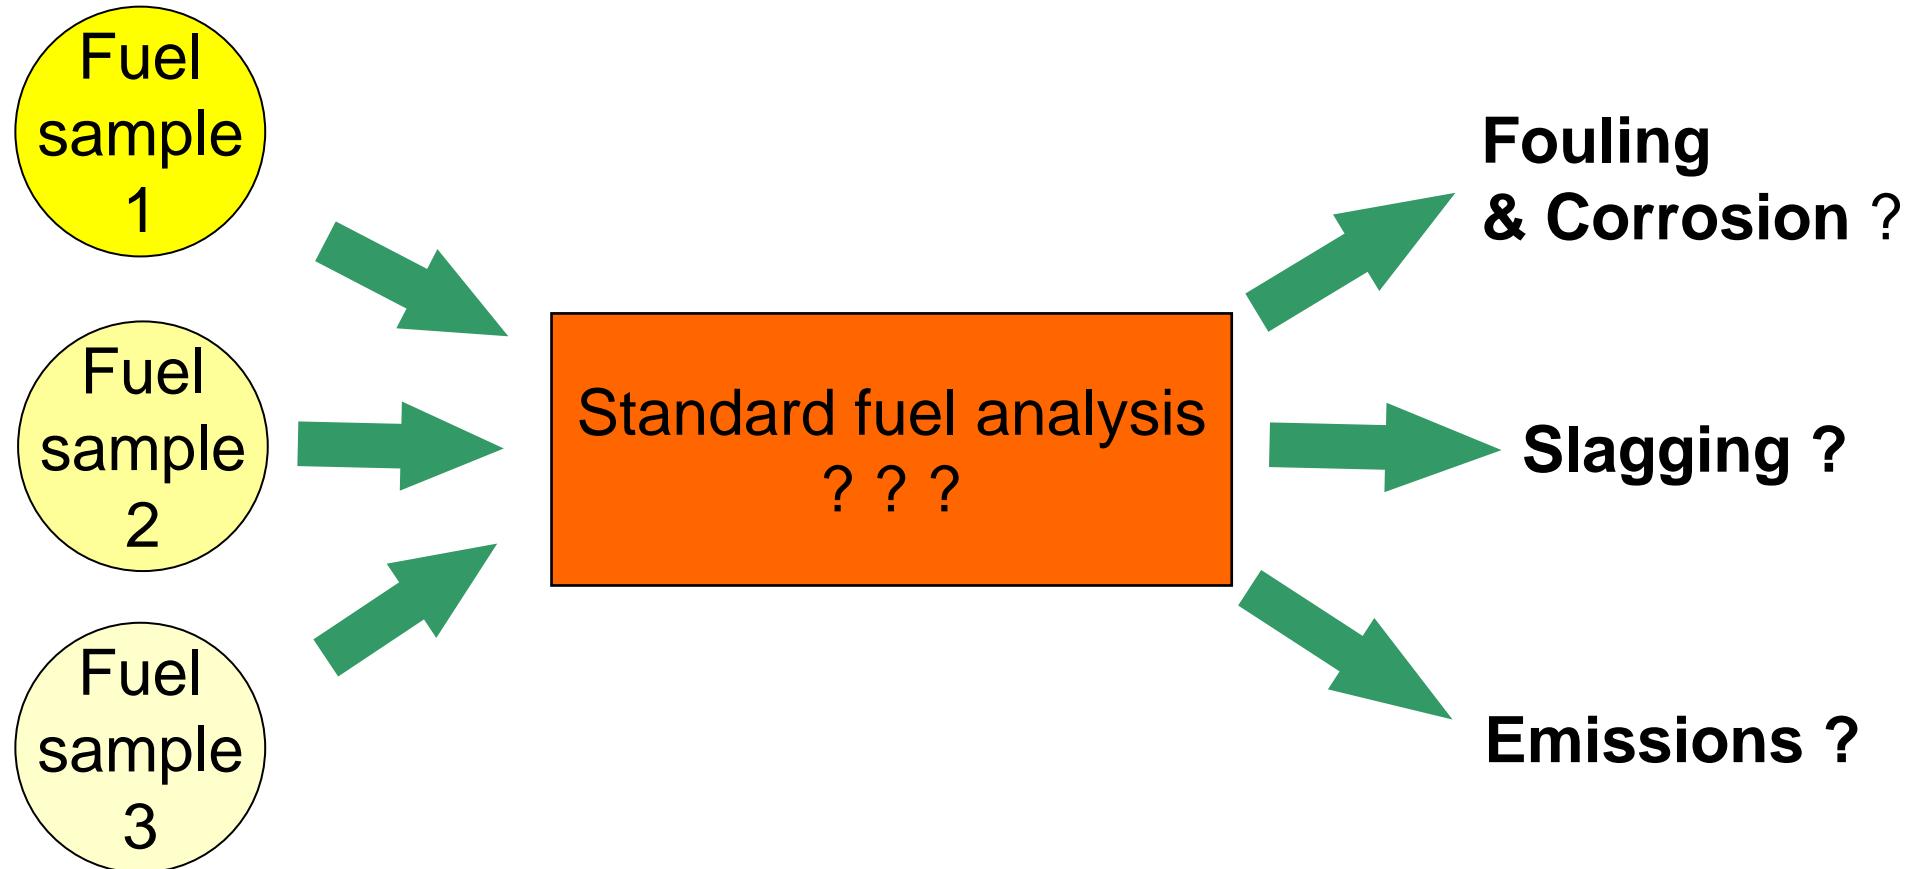

Capacity : 550 MW<sub>th</sub>

Steam: 194 kg/s,  
165 bar, 545°C

Energy production:  
240 MW<sub>el</sub> (alt. heat)

# ÅA biofuel database

Conventional fuel analyses  
(proximate, ultimate, ash)

Stepwise leaching analyses  
(water, acetate, acid soluble)

SEM + EDS analyses  
(original & partly burned-out fuels)

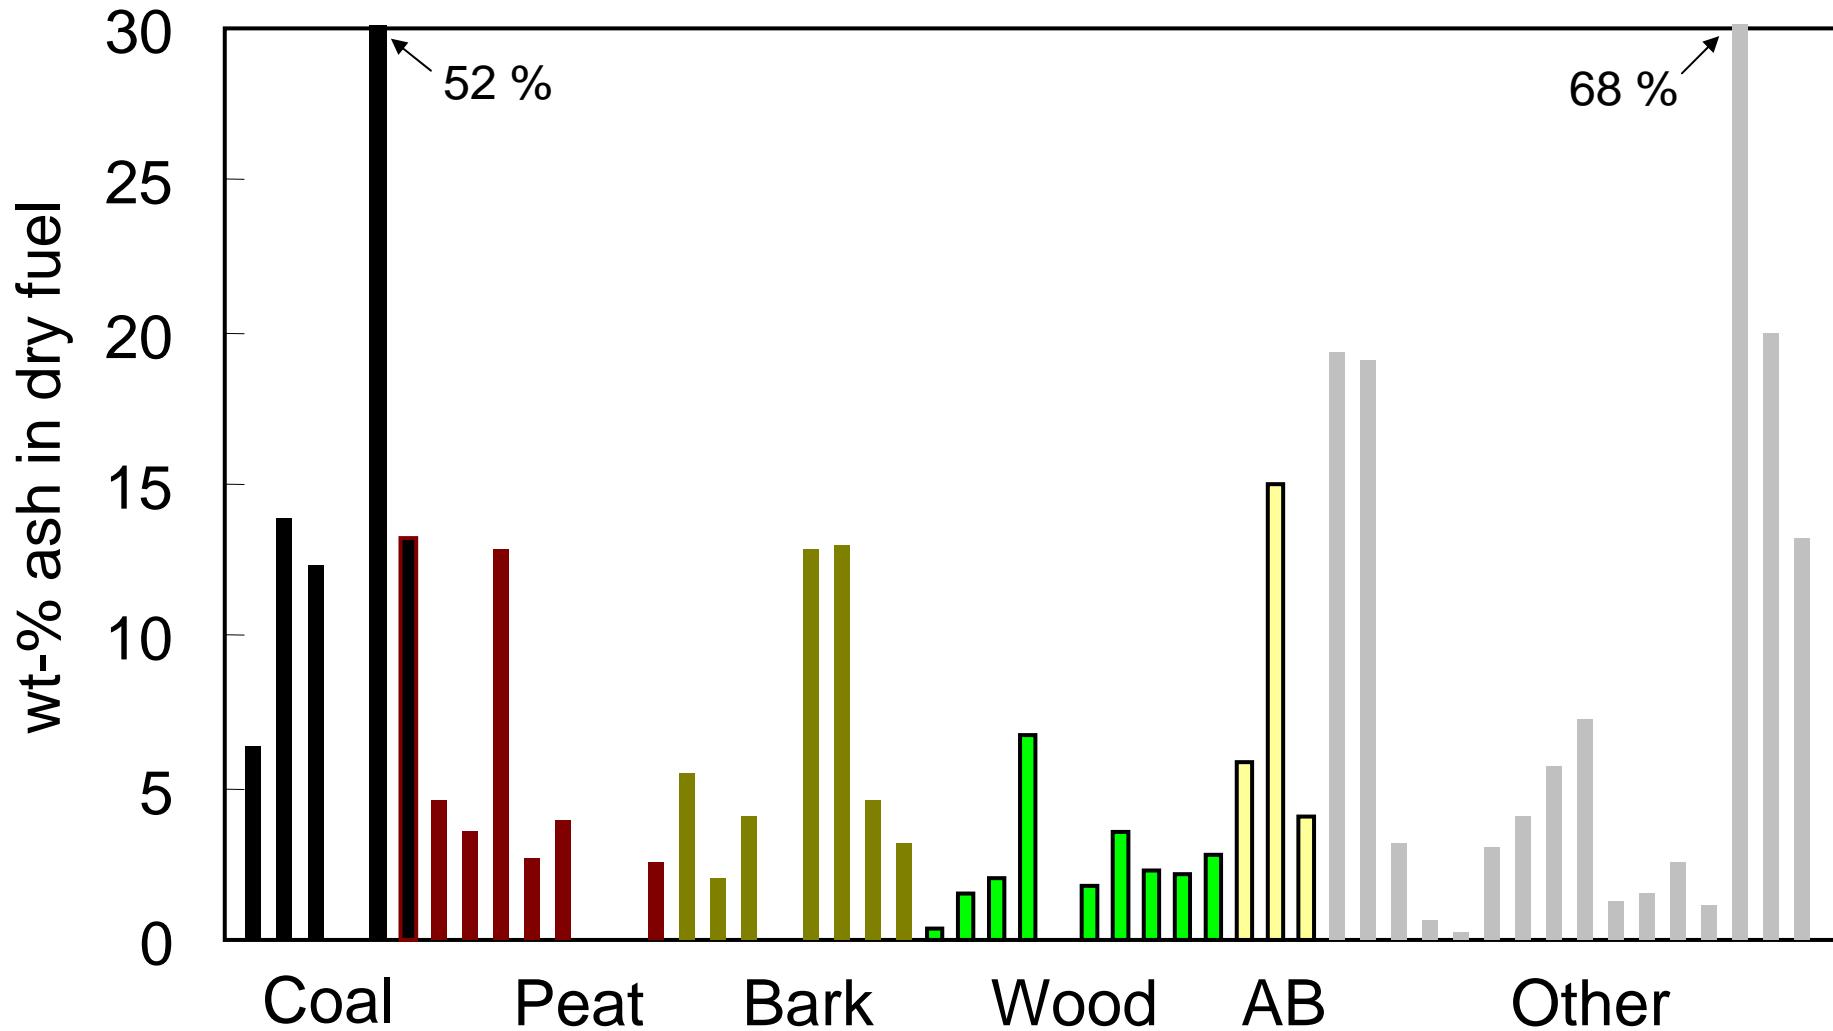

Melting behavior calculations  
(reactive fraction)

# ÅA biofuel database

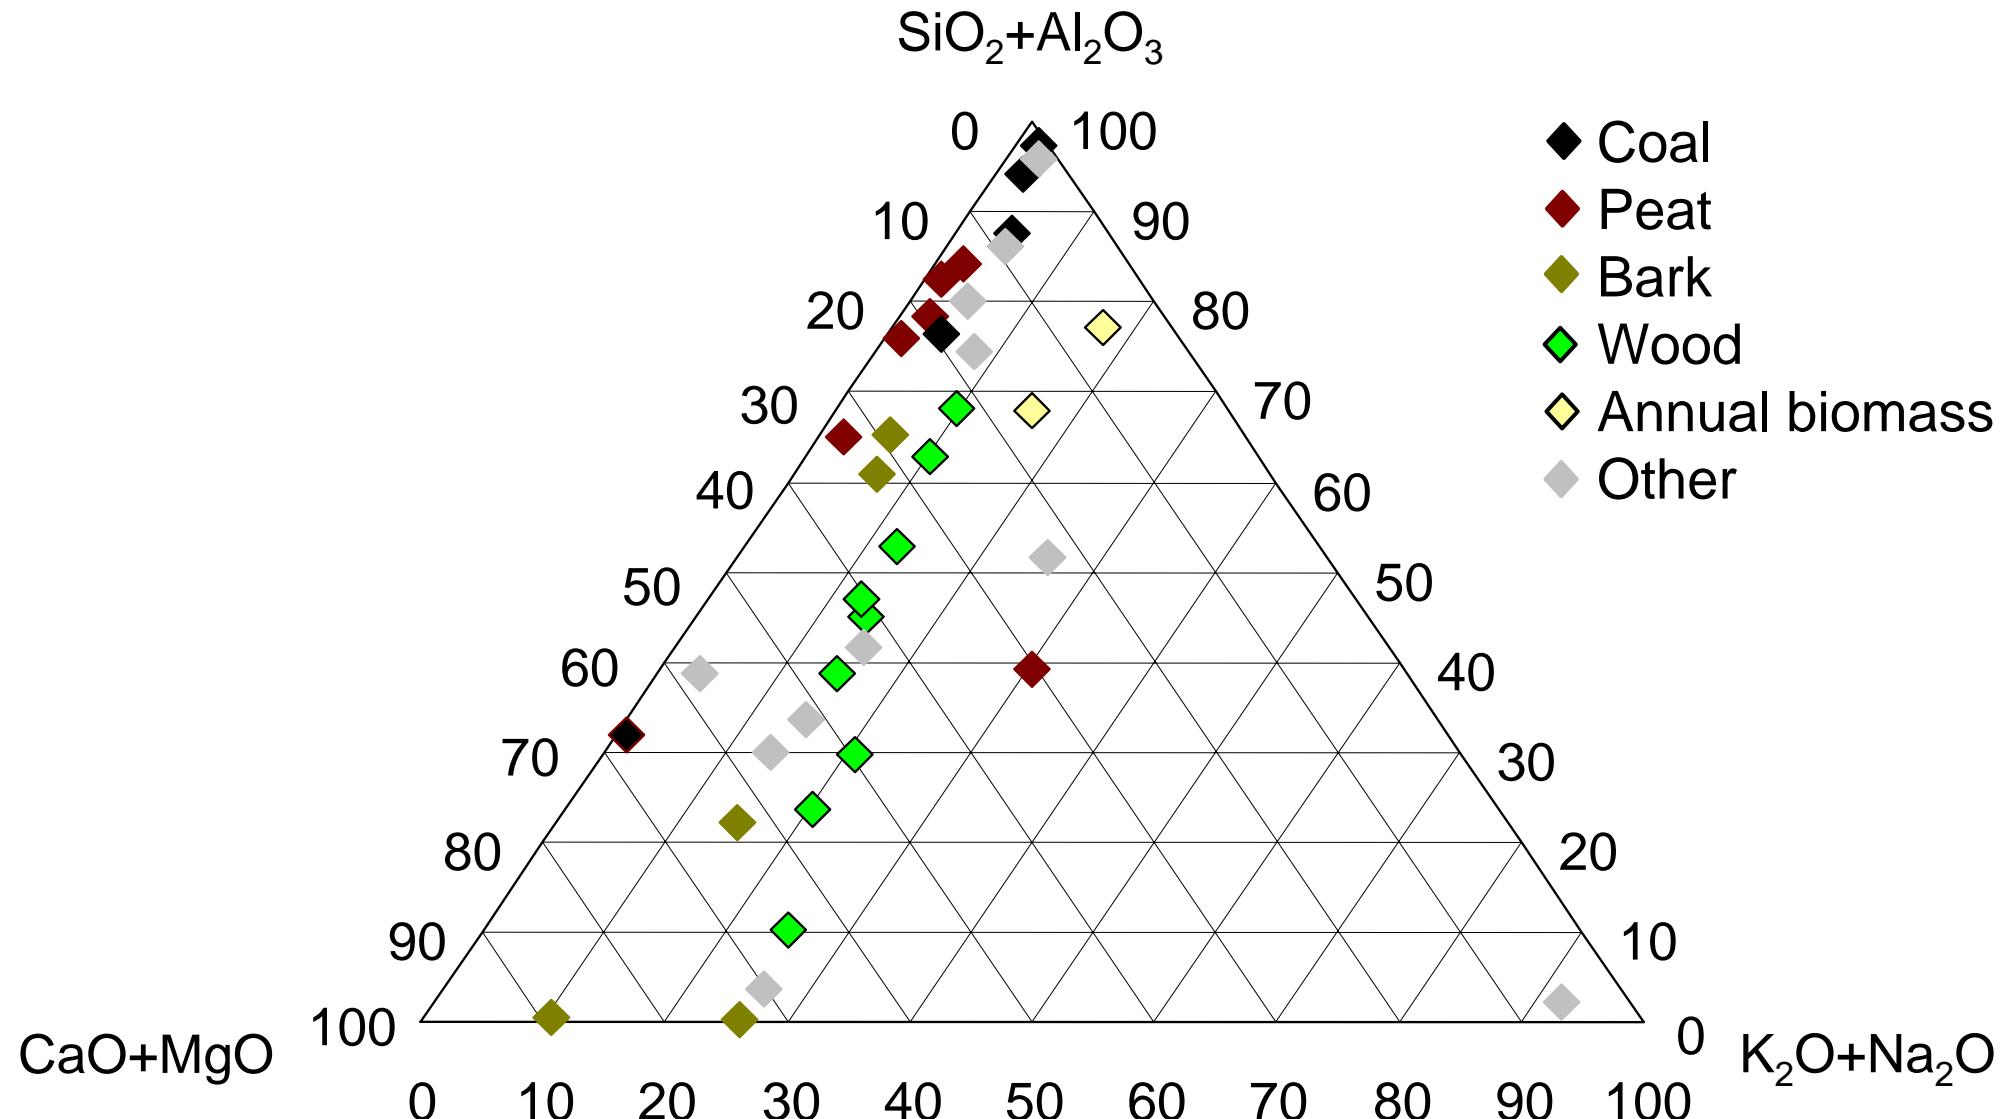

Total: 51 fuels per May 2002

- 8 bark fuels
- 10 wood fuels (steam wood, forest residue)
- 3 annual biomasses
- 8 peats
- 6 coals
- 16 others (RDF, sludge, hulls & husks,  
bagasse, other residues)

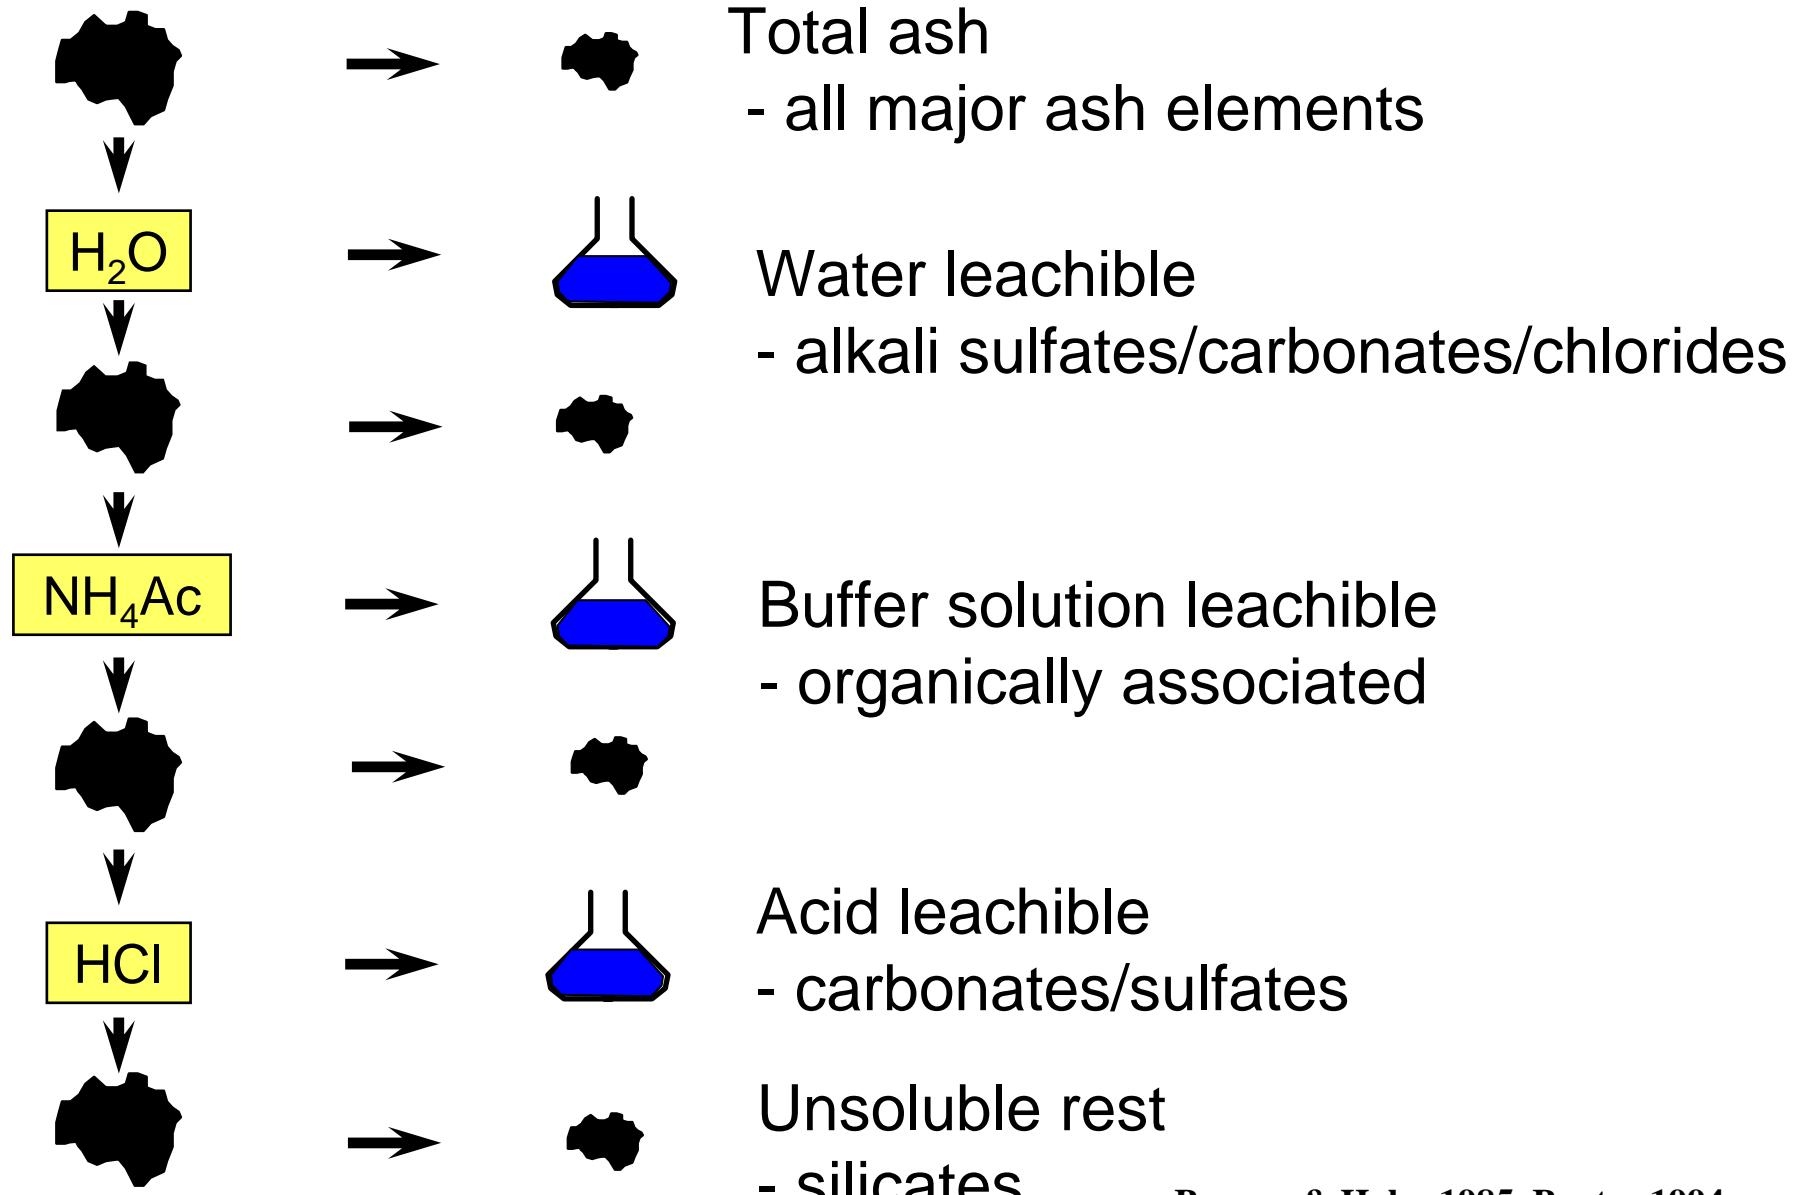

# ÅA biofuel database, % of ash

# ÅA biofuel database, composition of ash

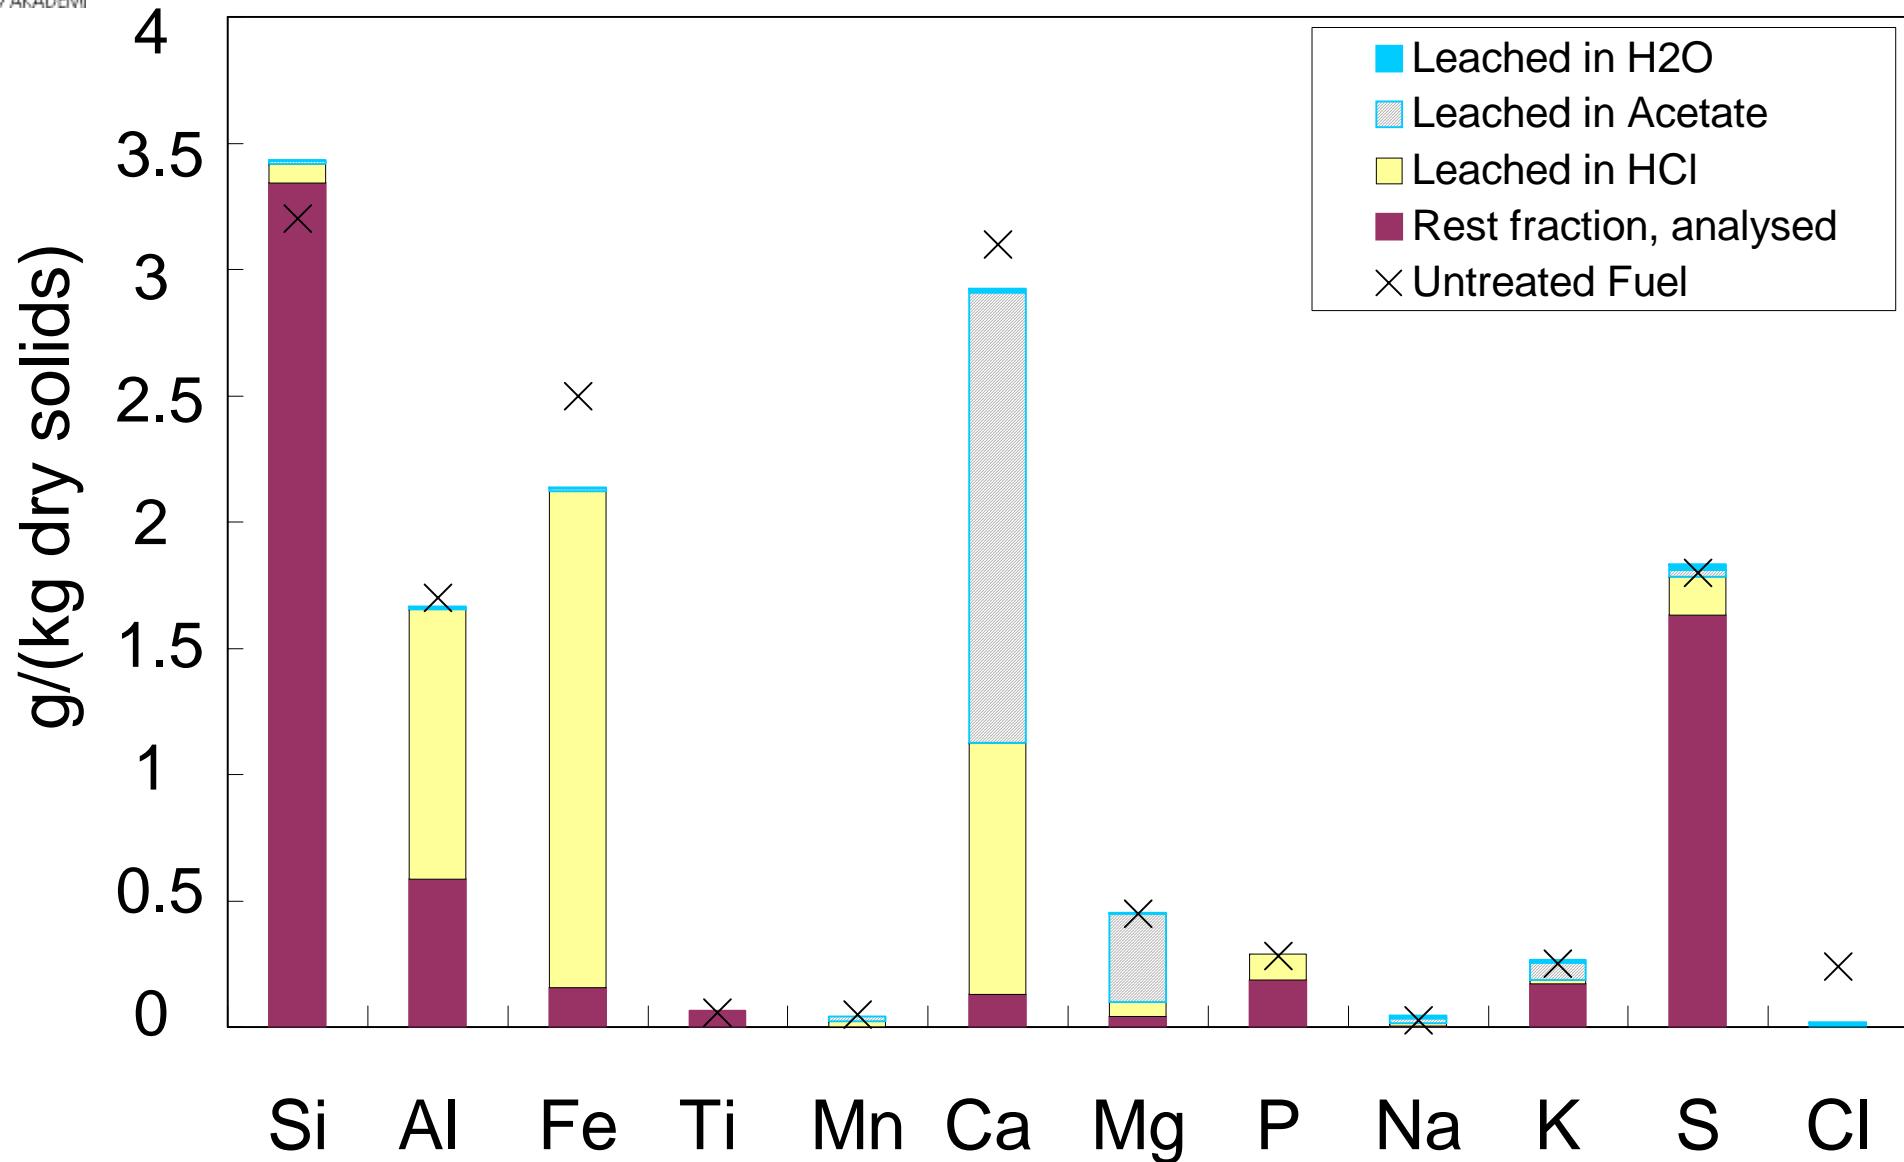

# Stepwise leaching

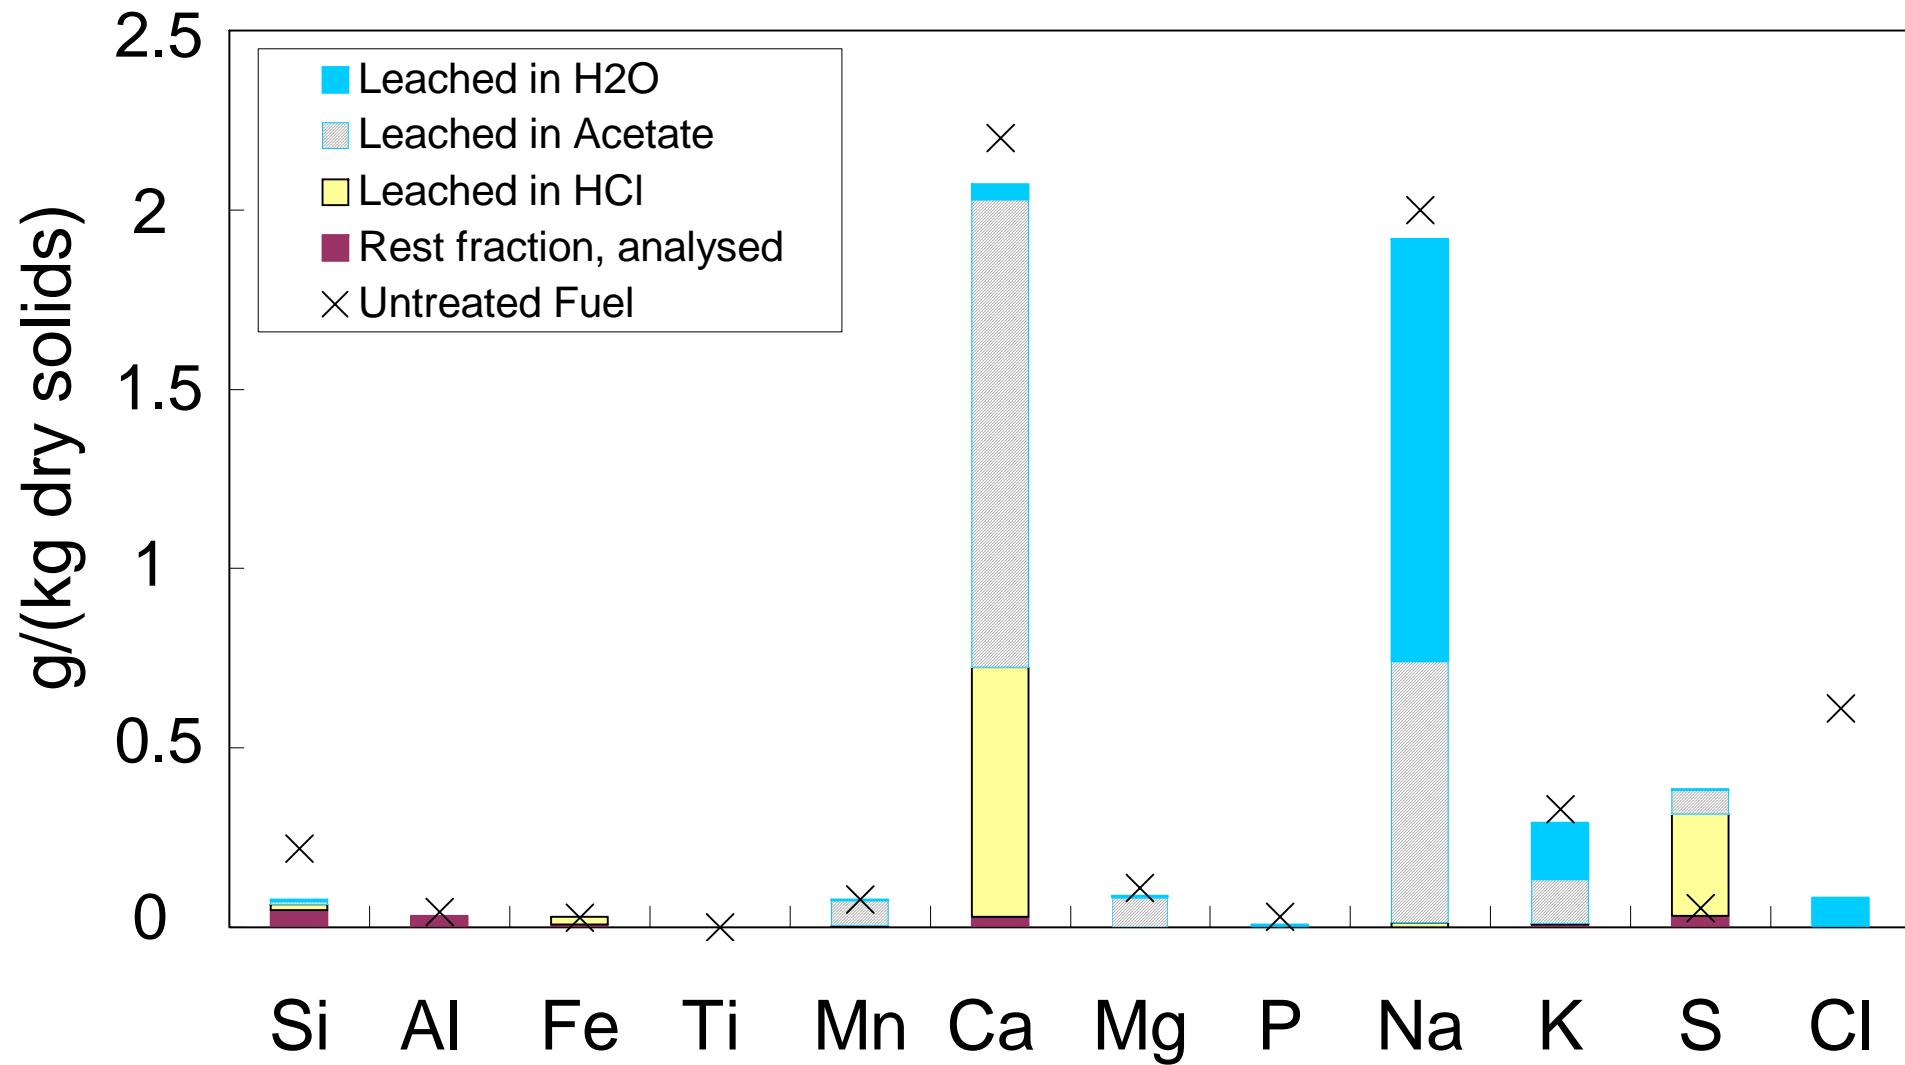

Benson & Holm 1985, Baxter 1994

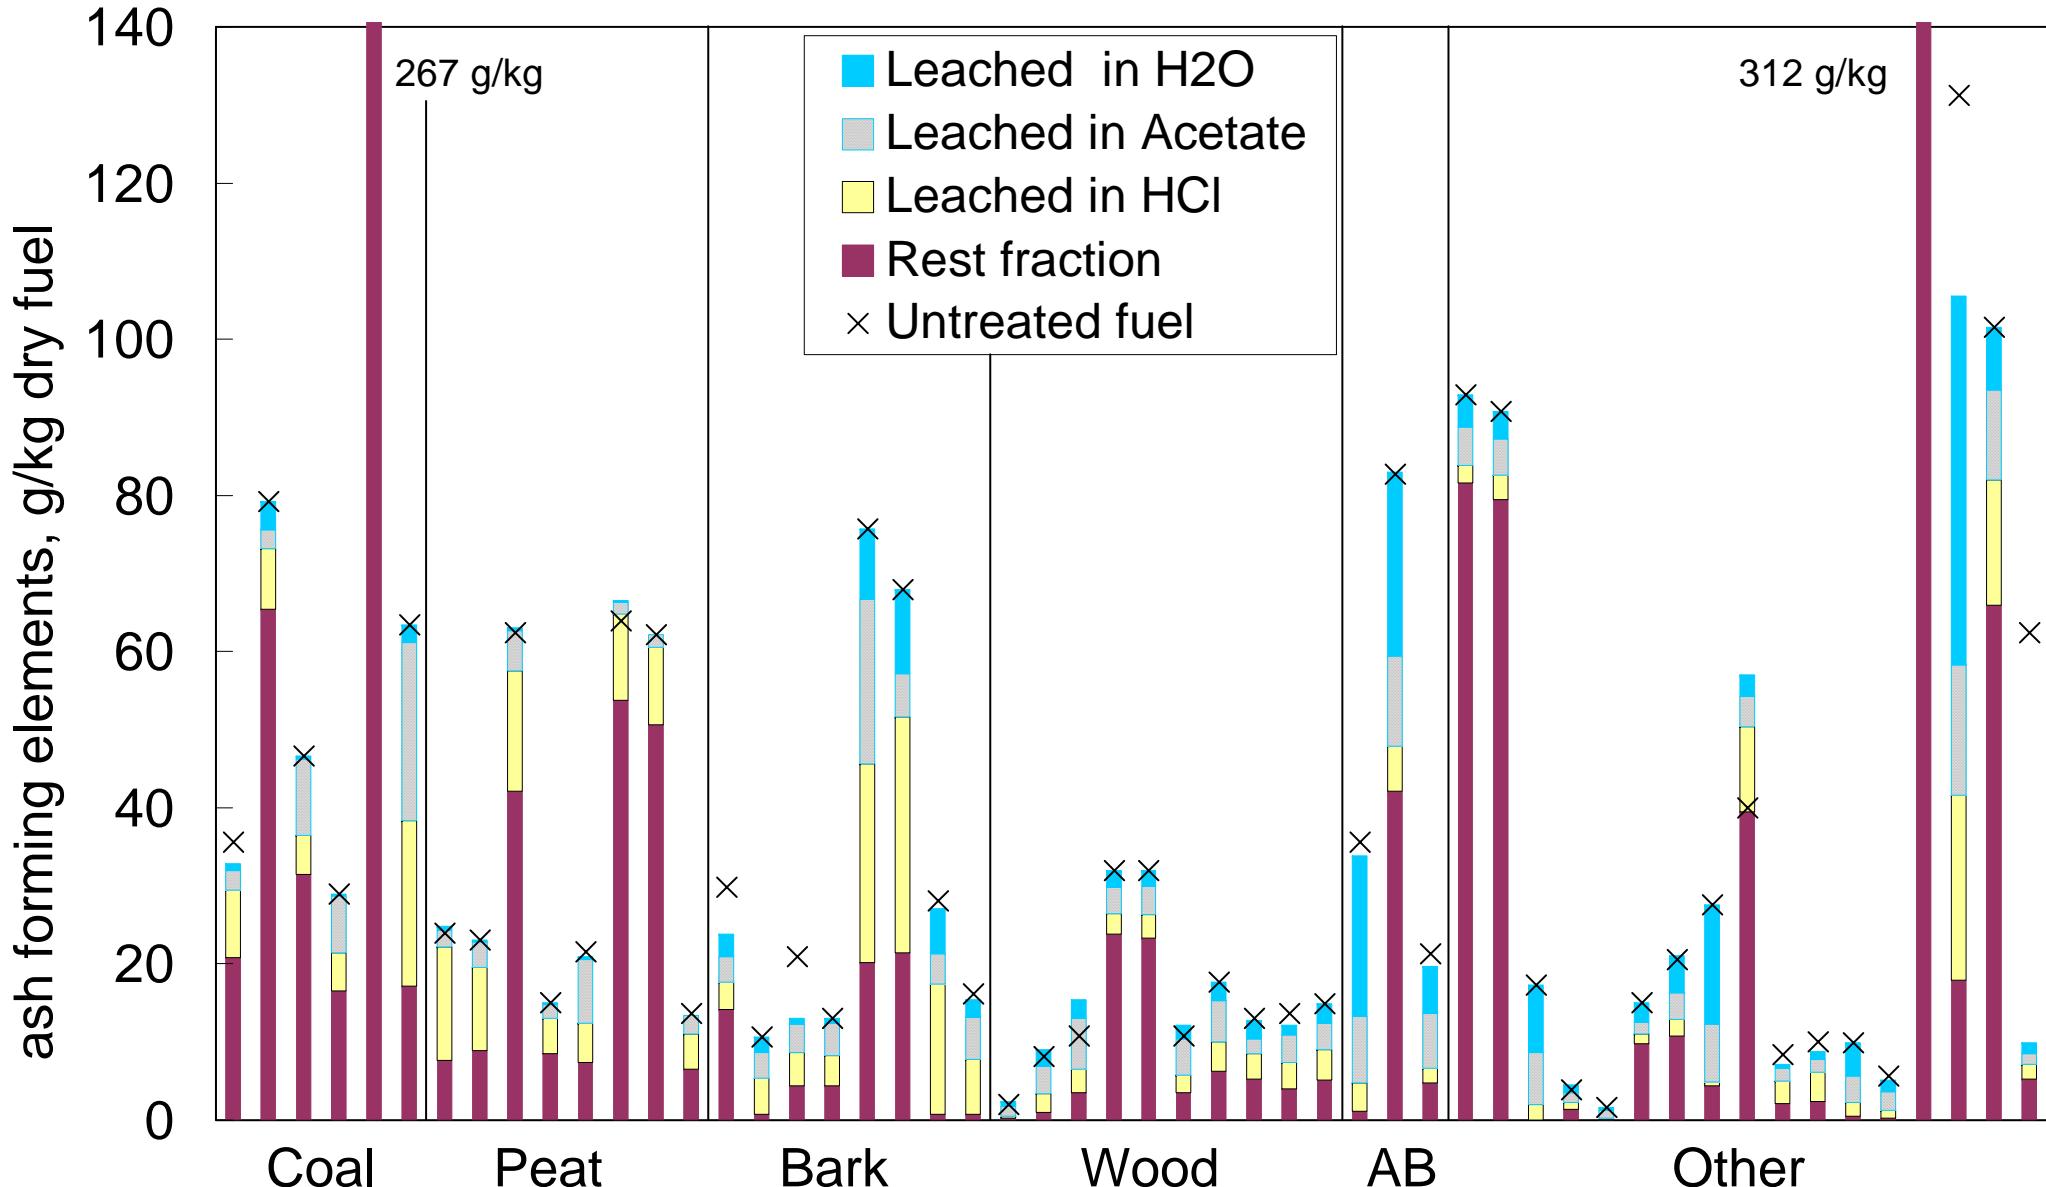

# Stepwise leaching of peat

# Stepwise leaching of plywood

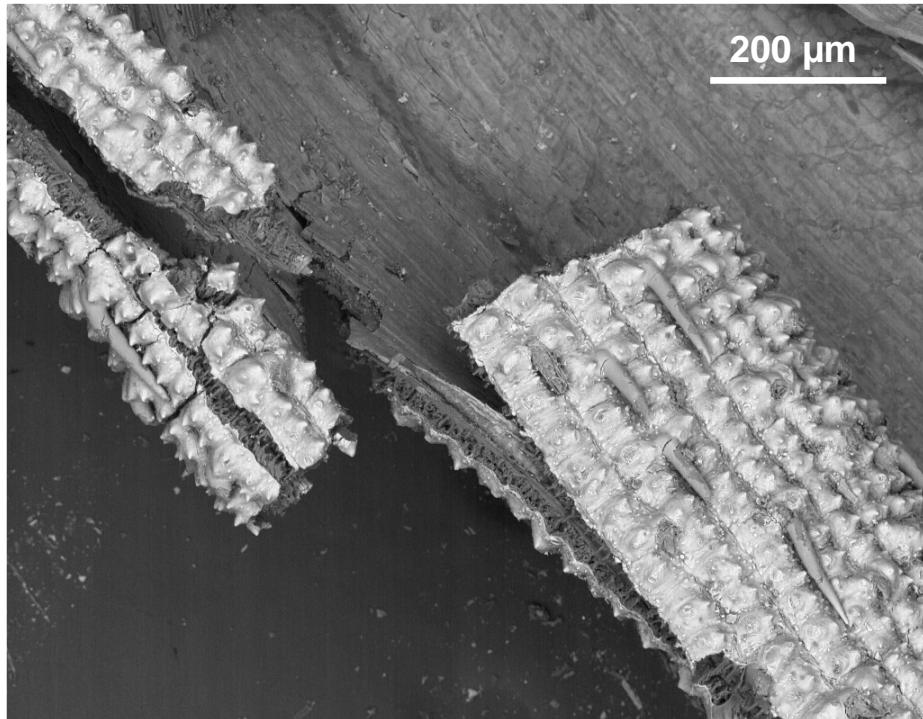

# Stepwise leaching, ÅA biofuel database

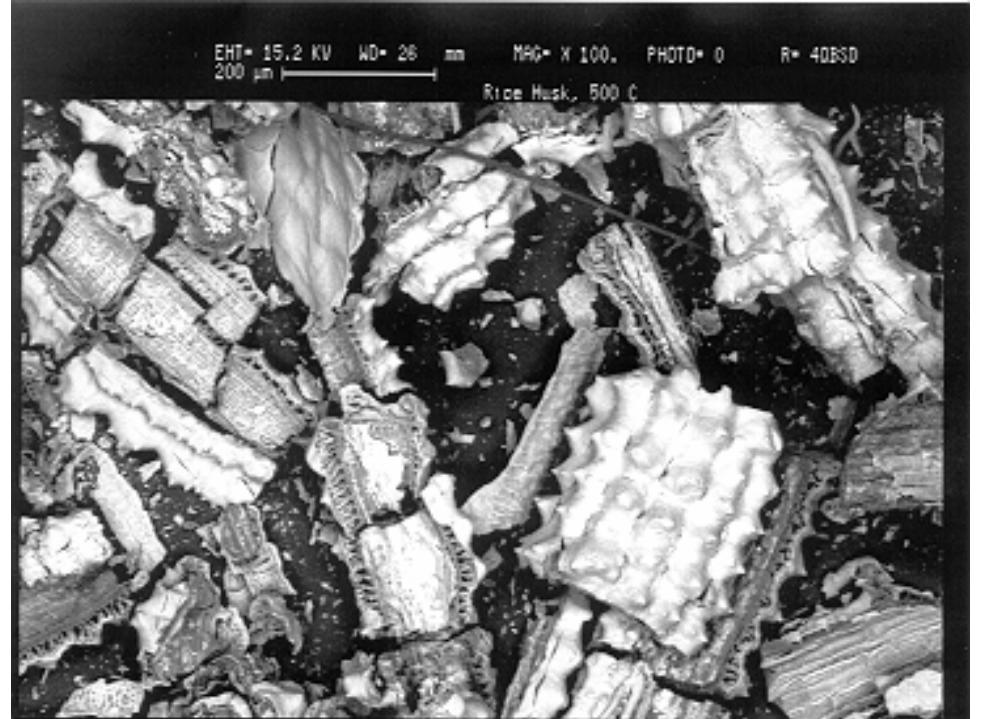

# SEM, ÅA biofuel database

Rice husk, untreated fuel

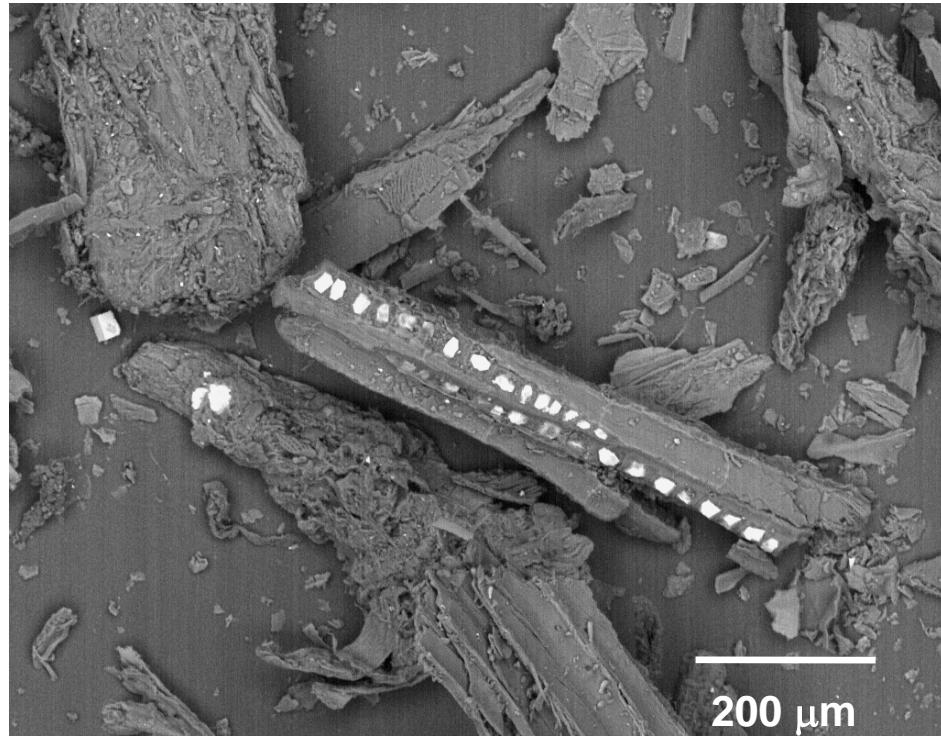

Rice husk laboratory ash, 700°C

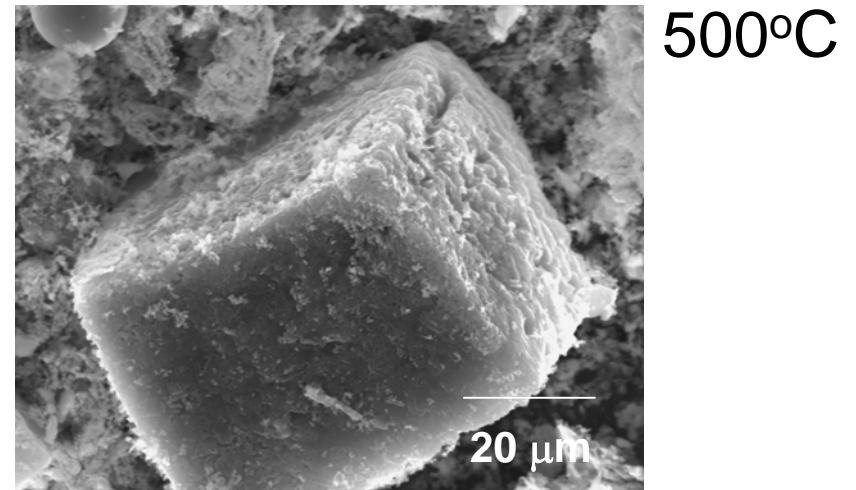

# SEM, ÅA biofuel database

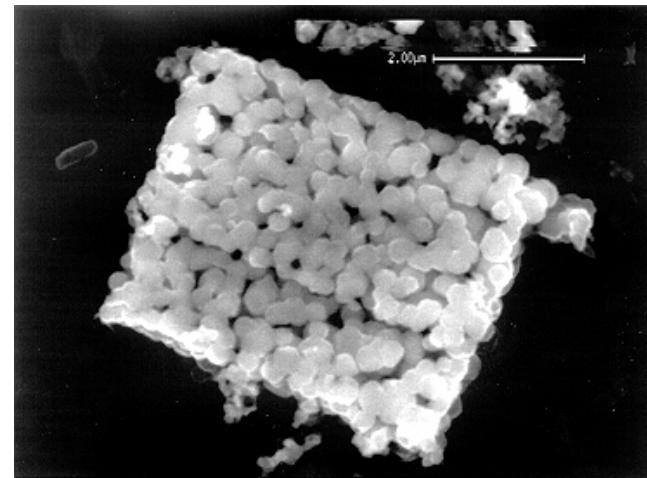

Bark, untreated fuel

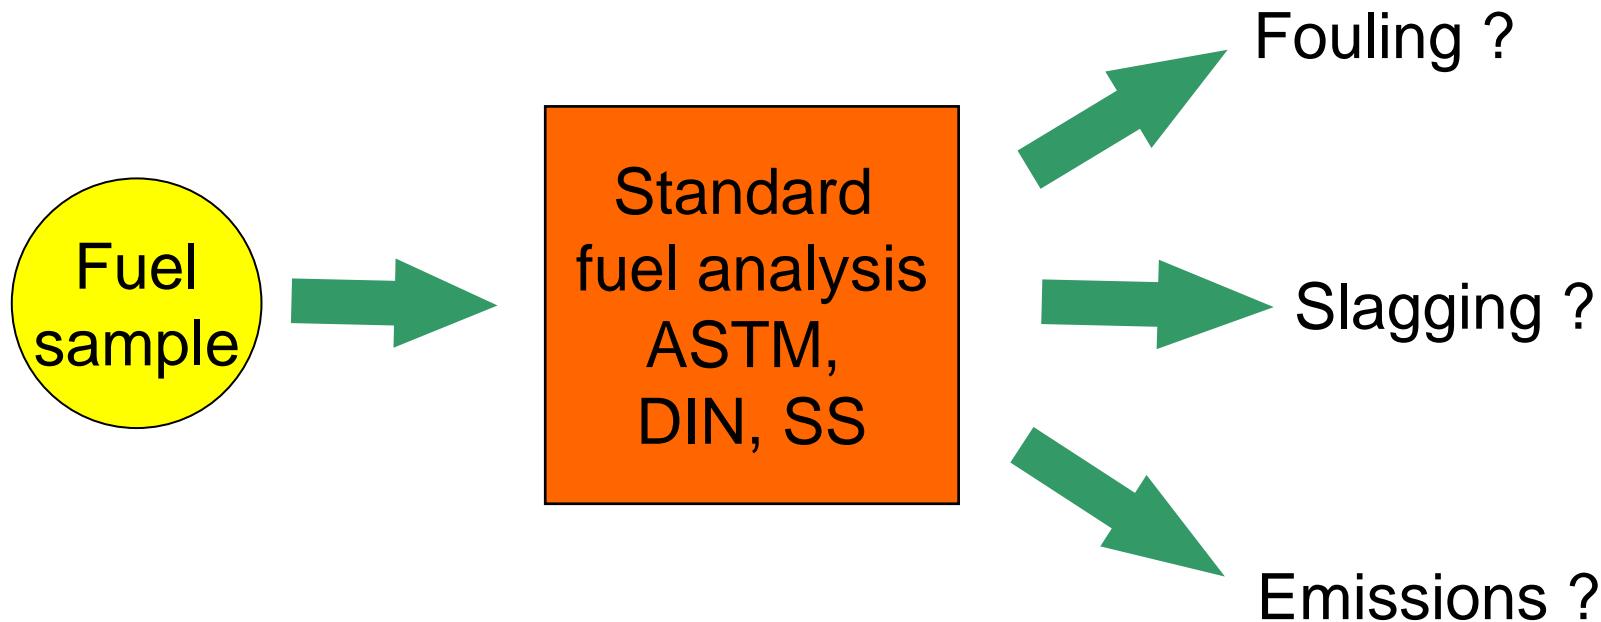

Bark, laboratory ash

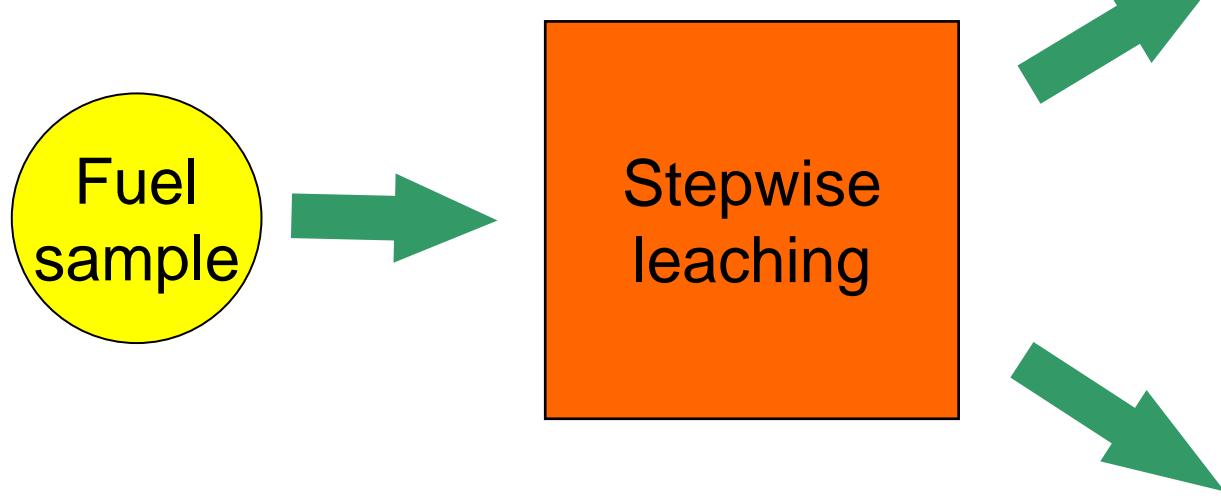

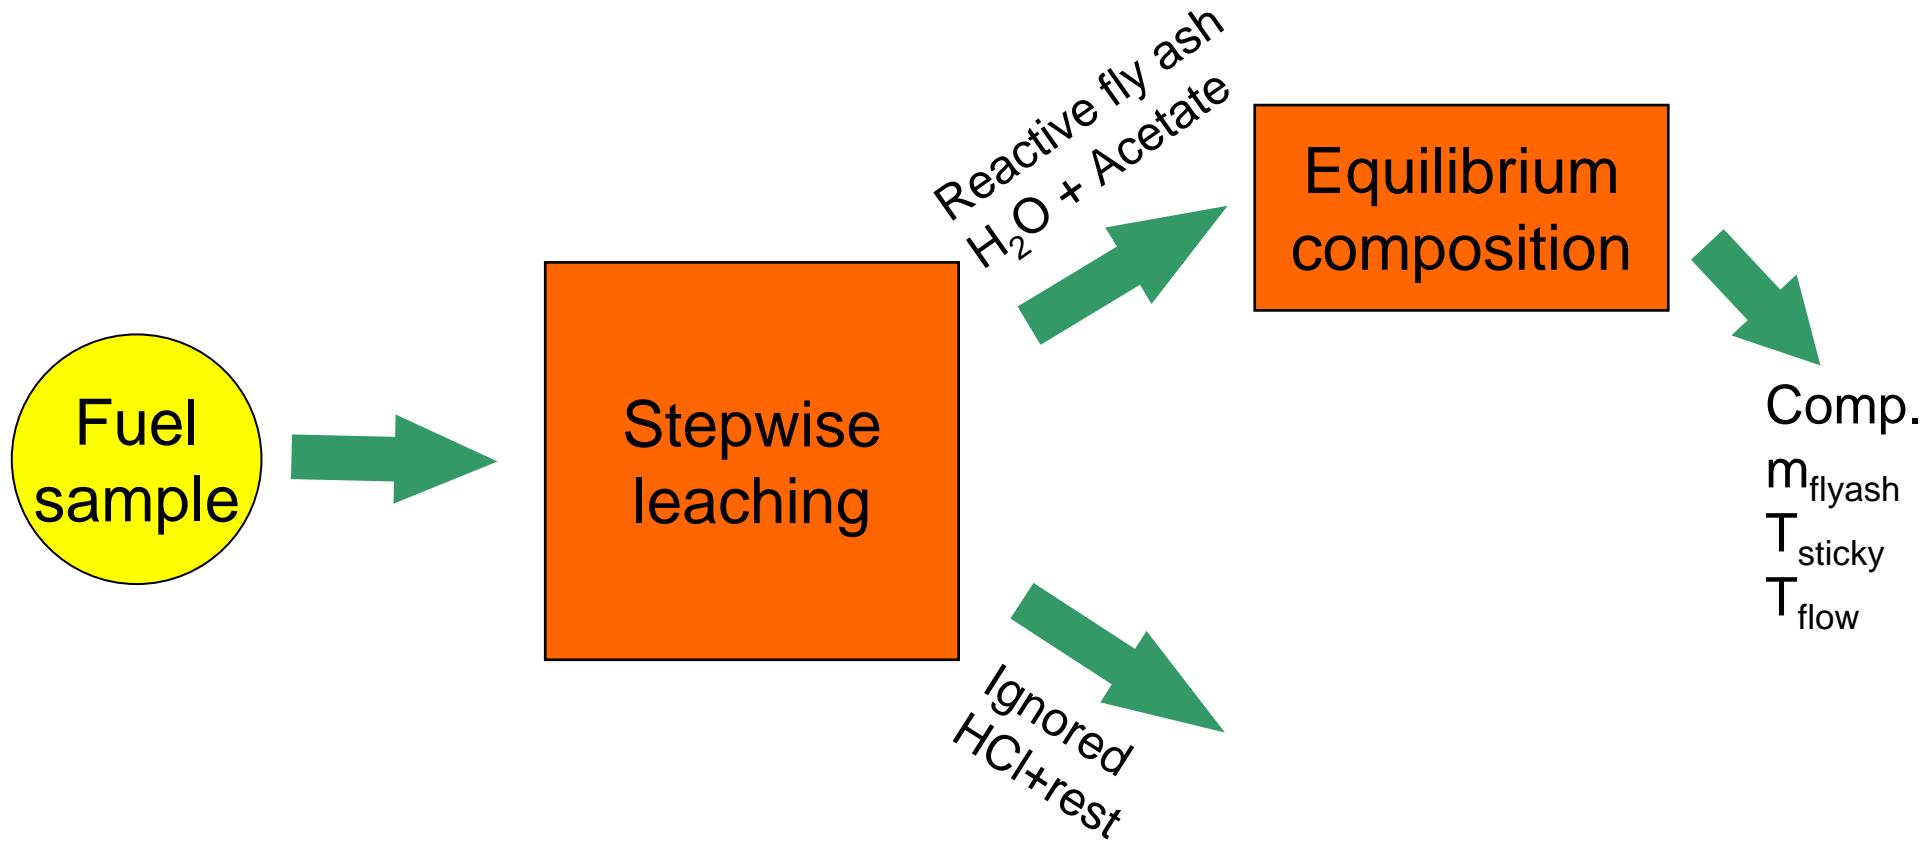

500°C

900°C

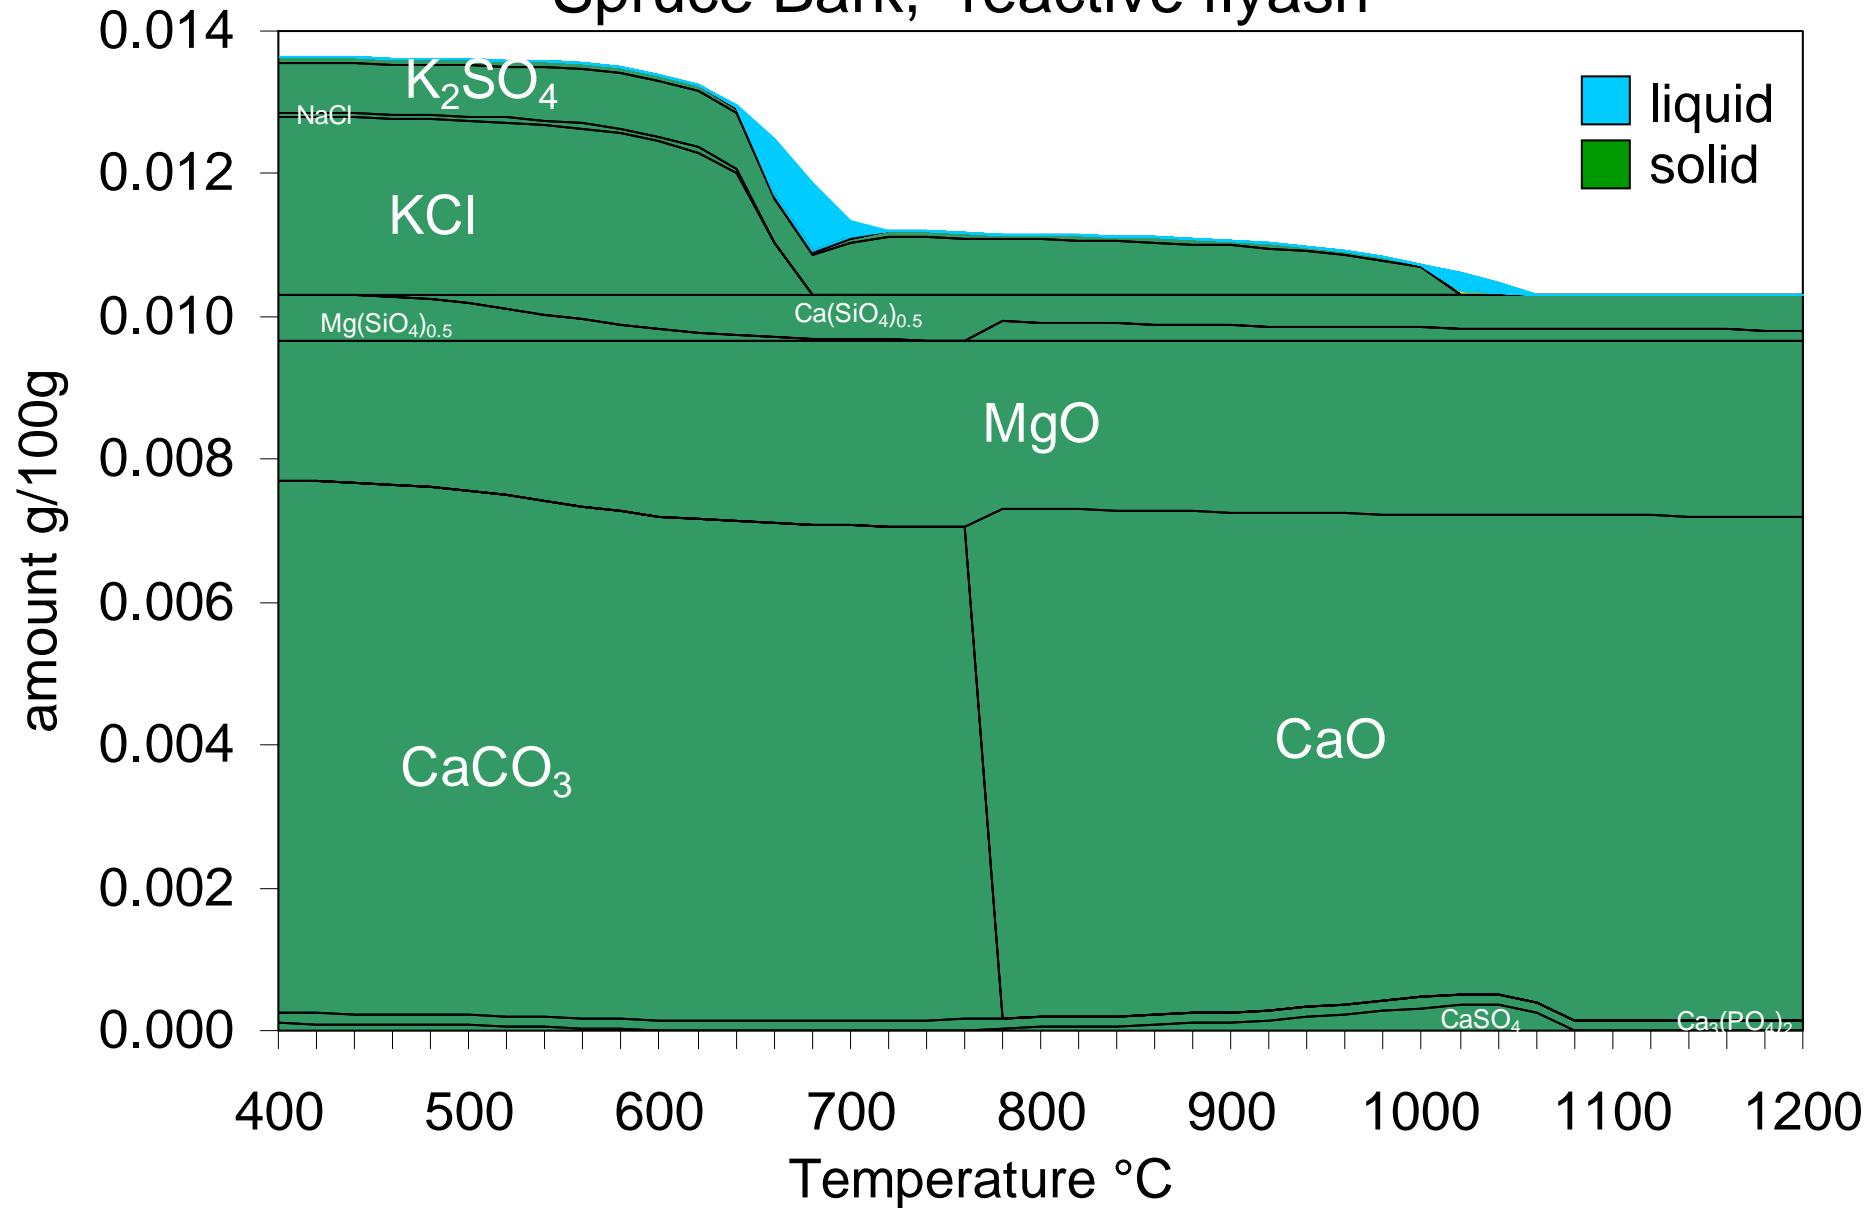

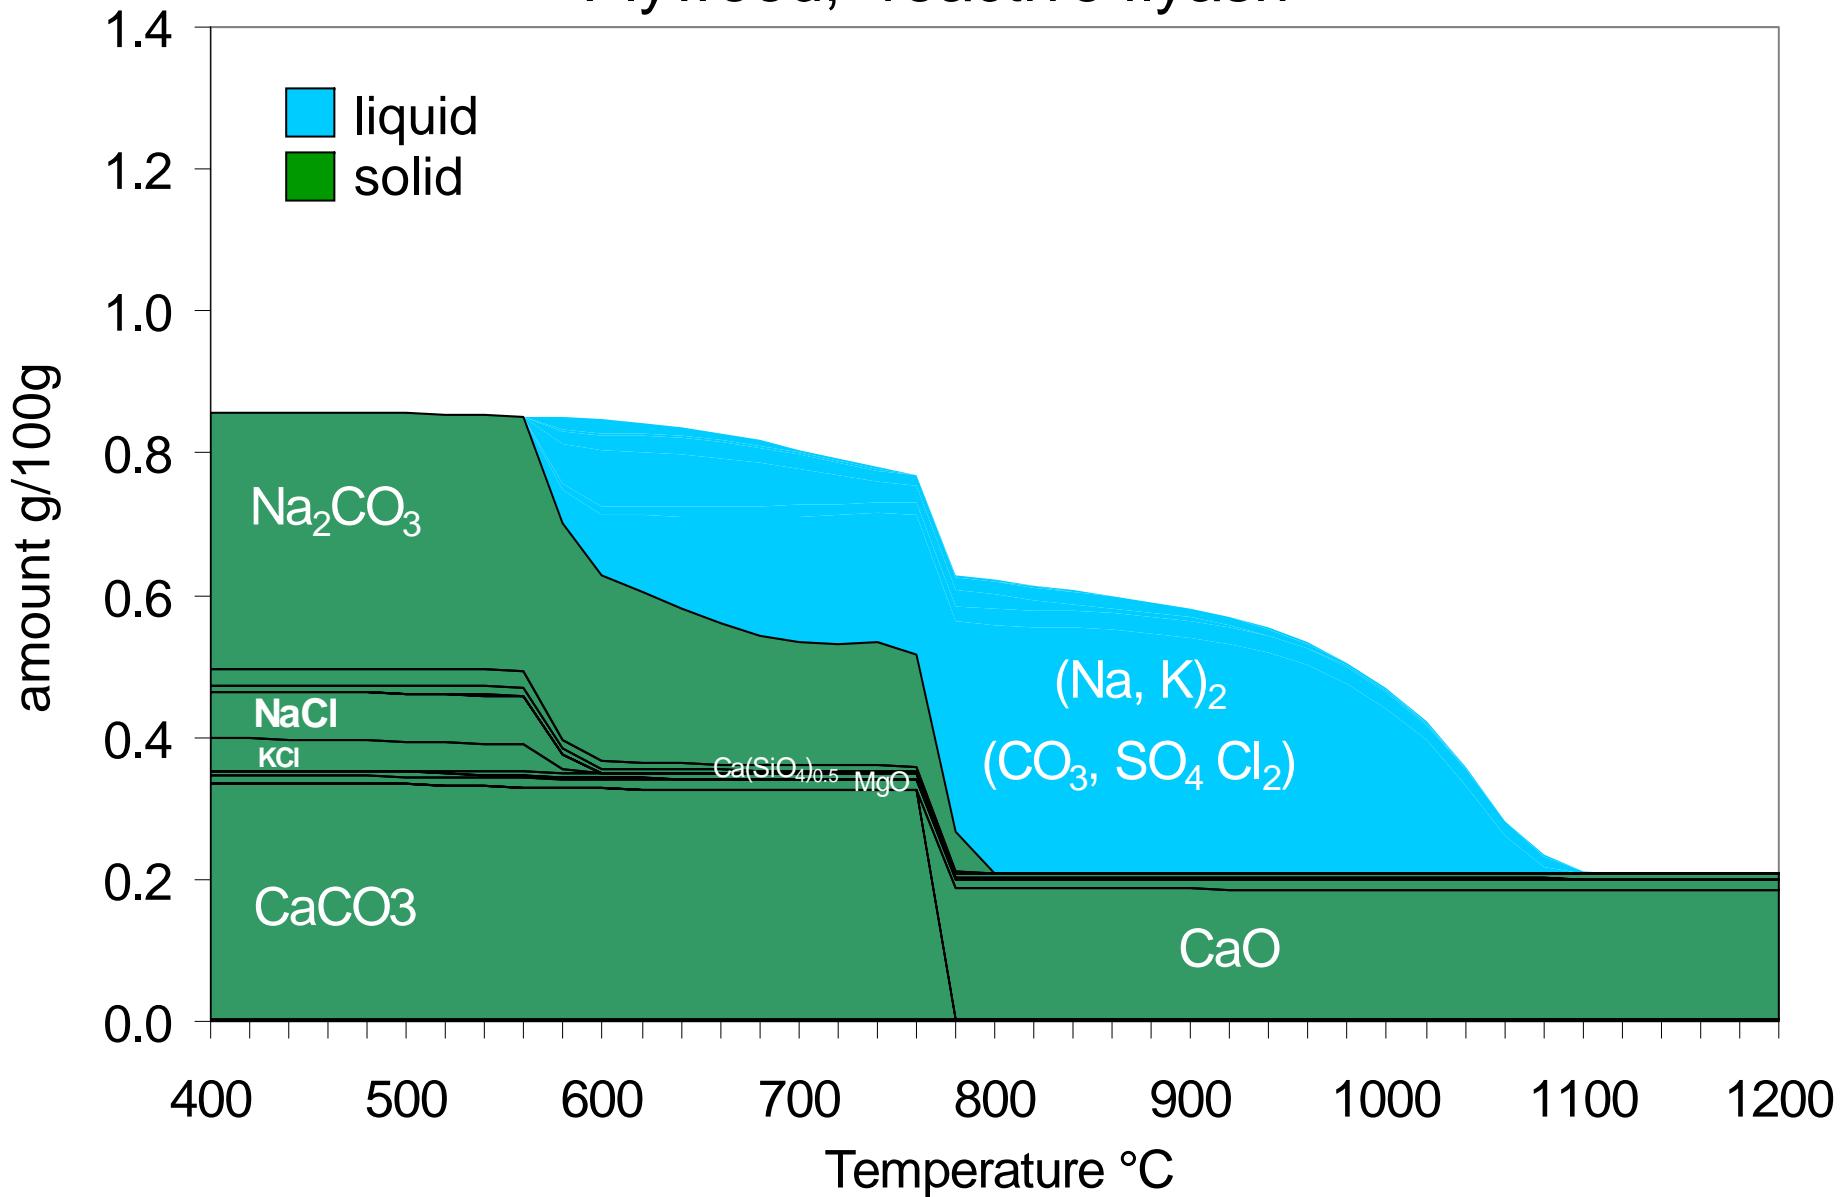

# Chemical equilibrium calculation

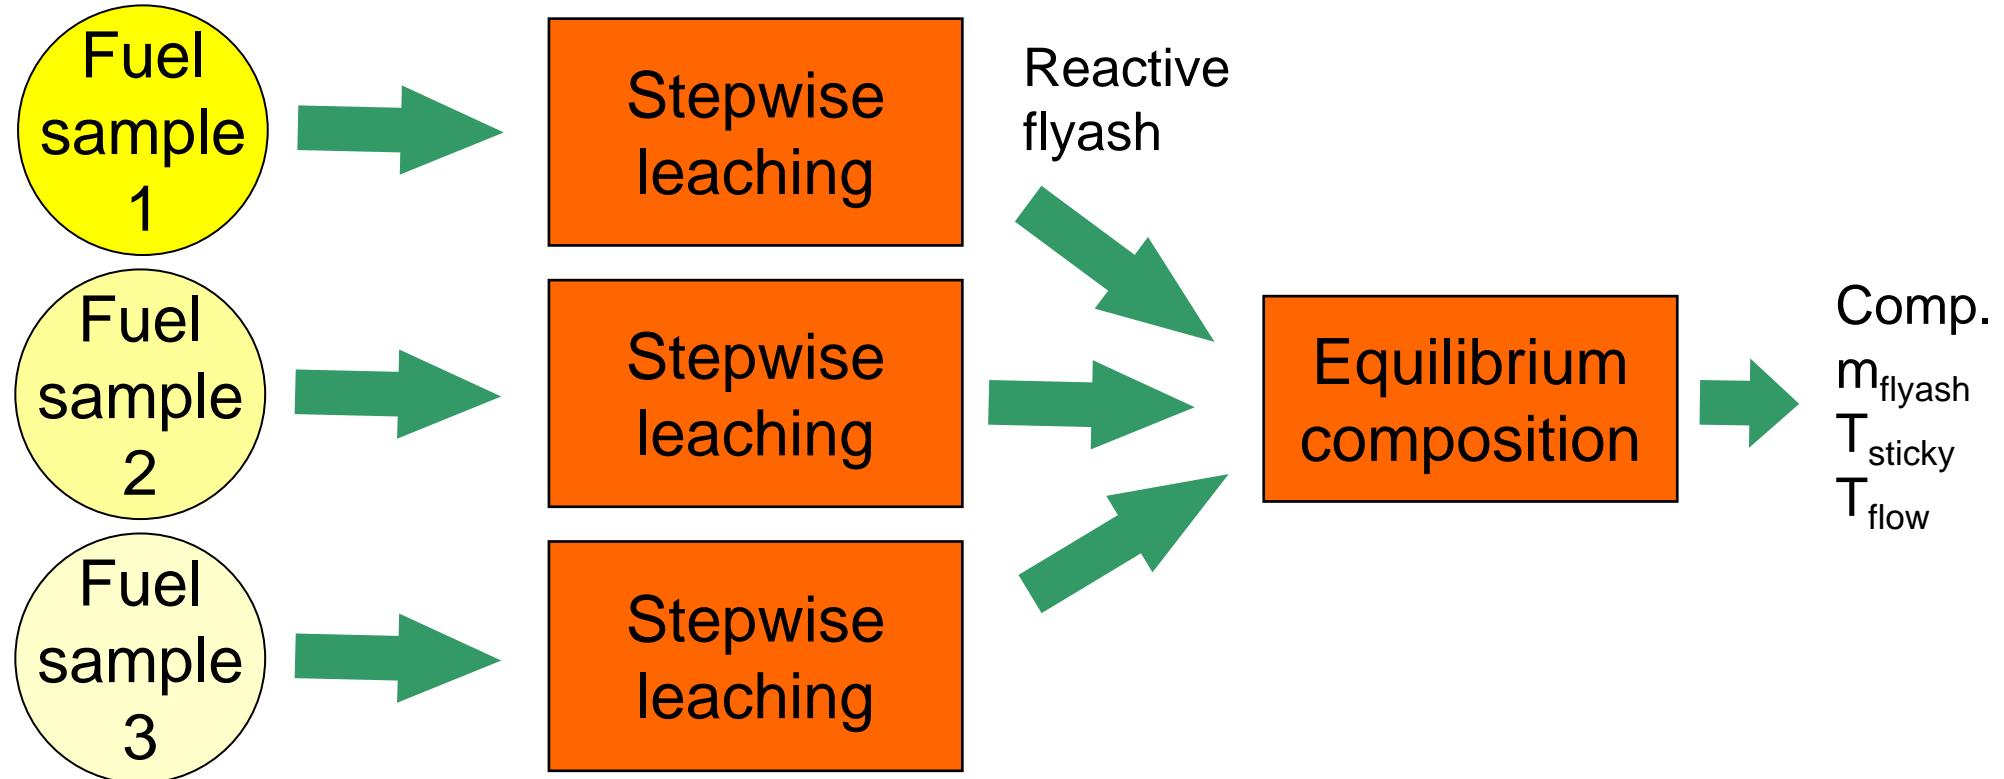

## Spruce Bark, “reactive flyash”

# Chemical equilibrium calculation

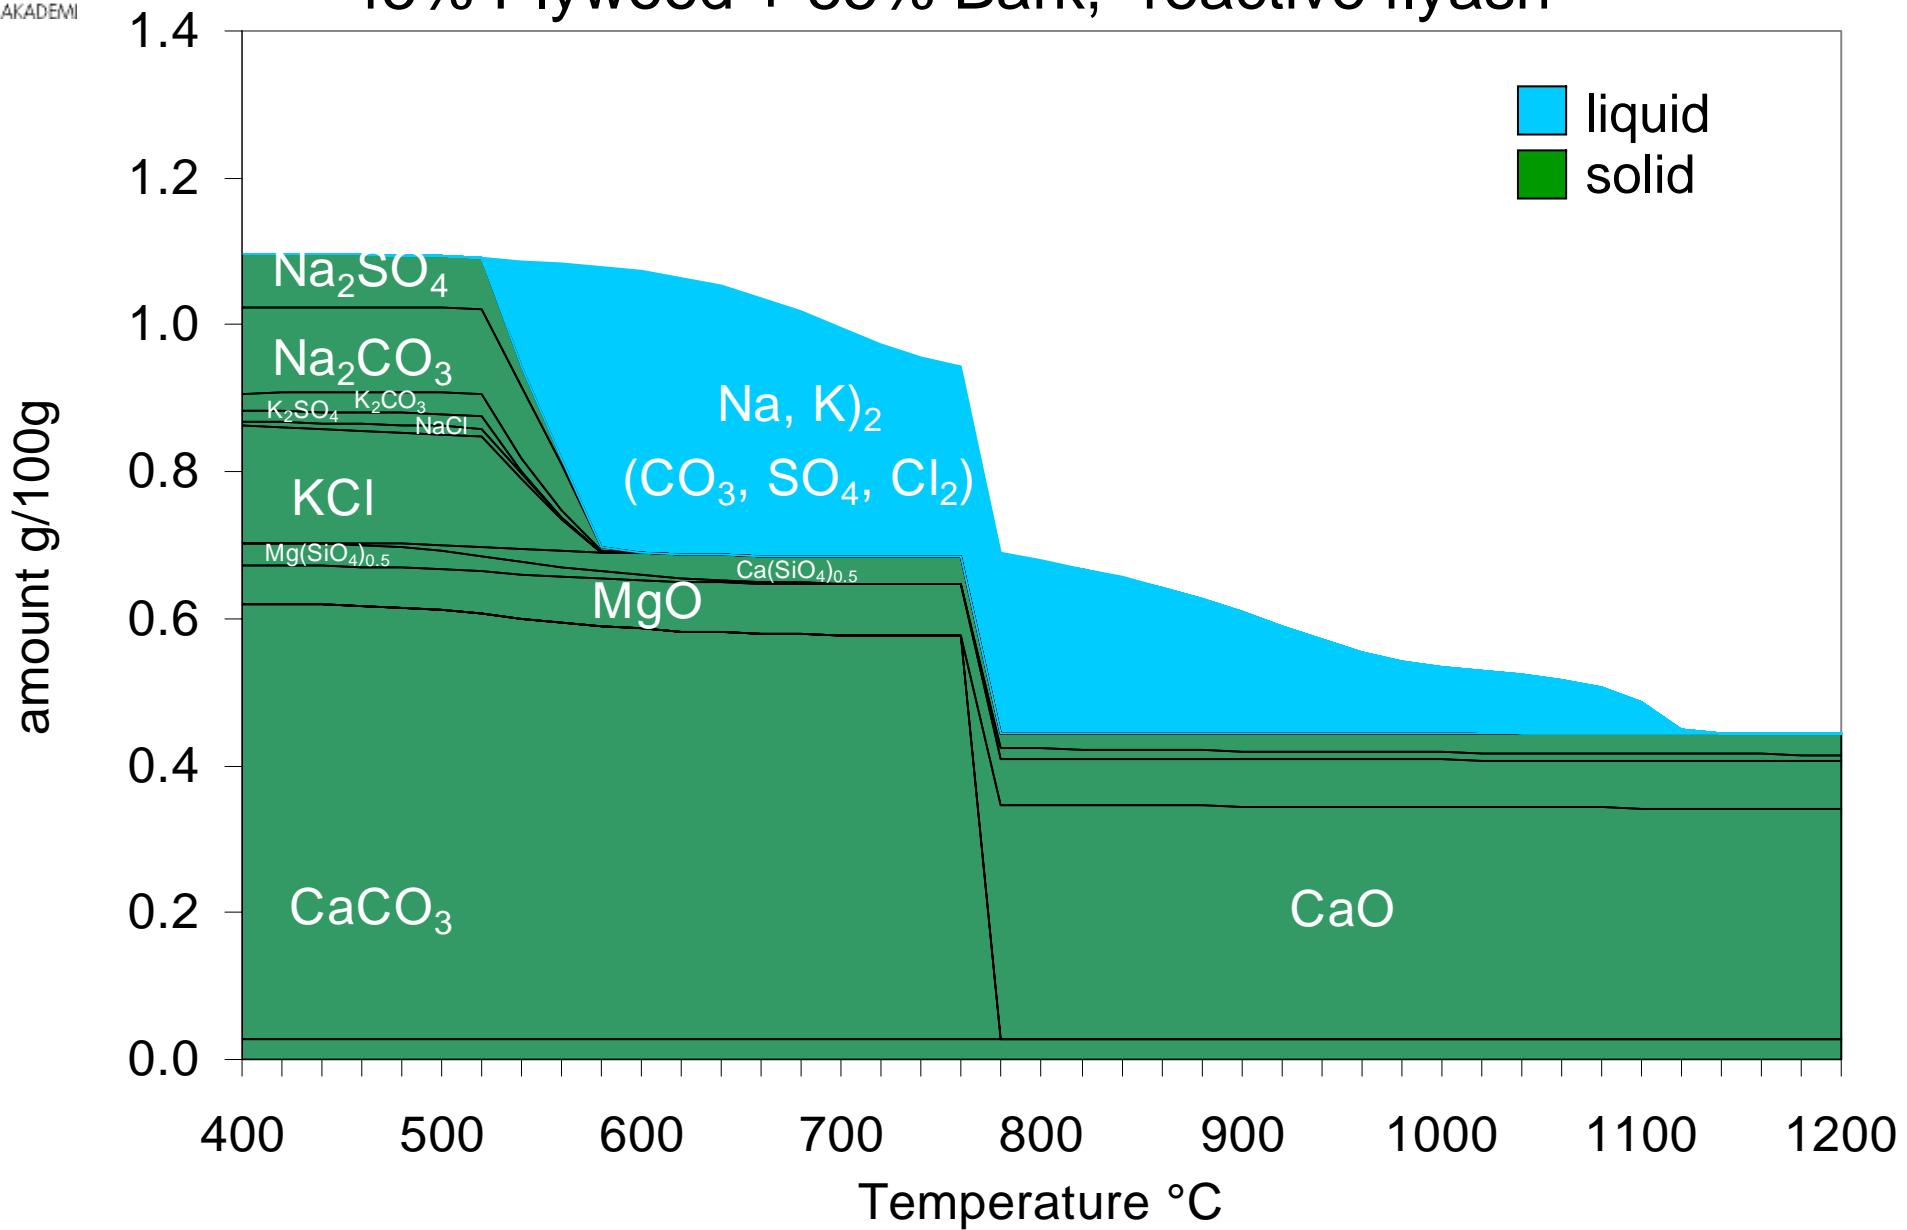

## Plywood, “reactive flyash”

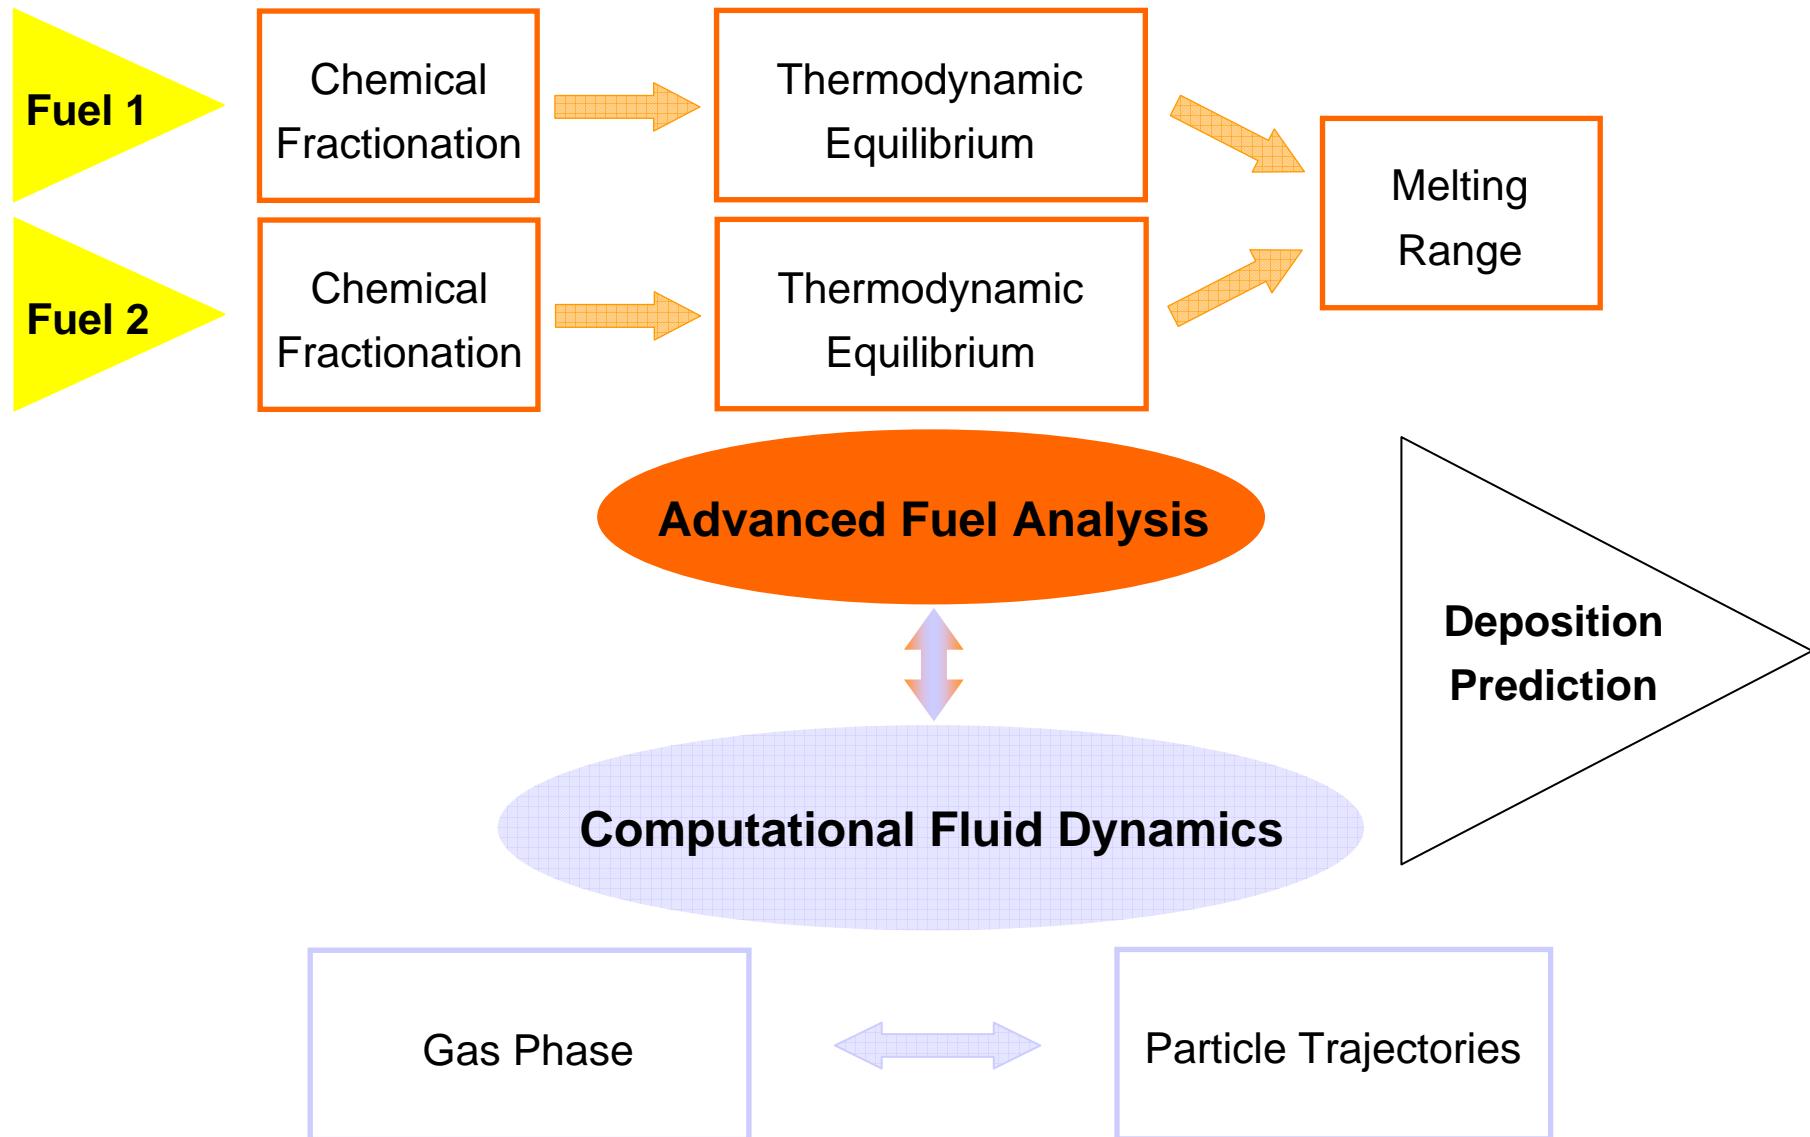

# Chemical equilibrium calculation

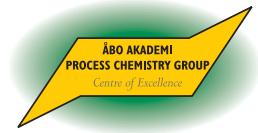

## 45% Plywood + 55% Bark, “reactive flyash”

# Stepwise leaching + chem.eq. + CFD

# Acknowledgments
